General Safety Precautions

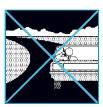

The illustrations below indicate the general safety precautions to be taken when using your mobile phone.

The use of mobile phones in aircraft:

- u Is dangerous to aircraft operations
- u May disrupt the cellular network
- u Is illegal

Failure to observe in-flight regulations may lead to the suspension of cellular services and/or legal action.

NEVER use your phone while driving, even if it allows hands-free operation. Always park your vehicle first.

In some countries, it is illegal to use mobile and radio telephones whilst driving.

You are advised to turn off the phone when at a refuelling point (petrol station for example).

NEVER store or carry inflammable gas, liquids or explosive materials in the same compartment as your mobile phone.

DO NOT use the travel adapter if:

- u The power cord is damaged
- u It has been dropped or undergone a shock

Have a qualified after-sales service repair it. NEVER try to repair it yourself.

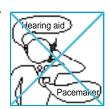

General Safety Precautions (cont.)

Avoid contact between the antenna and the face (especially the eyes) during a conversation.

Take care with the antenna in crowded places.

Being very concerned about health precautions, SAMSUNG recommends that you avoid using your mobile phone close to medical devices (pacemakers, etc.). If in doubt, consult the manufacturer of the medical device.

Avoid operating your mobile phone close to other electrical equipment (telephones, televisions, radios, personal computers, etc.), as it may cause interference.

DO NOT expose the phone and accessories to rain or any liquids.

Remove the battery from your phone and contact your dealer if the phone and accessories come into contact with any liquid.

DO NOT leave them in direct sunlight or in a humid, dusty or hot environment.

Battery Safety Precautions

The illustrations below indicate the precautions to be taken with the battery pack.

To maximise the charging capacity, avoid repetitive partial discharging and charging. It is recommended that you wait until the low battery warning tone sounds and the Low Battery message is displayed before charging the battery.

DO NOT charge the batteries in extreme temperature conditions:

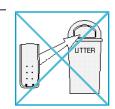

- u Above 45° C
- u Below 5° C

Attach the battery pack to the phone before charging with the travel adapter.

Battery Safety Precautions (cont.)

Any replacement battery pack must be of the same make and type. DO NOT dispose of used batteries in a fire or waste bin. Dispose of them in accordance with local legislation.

DO NOT disassemble the battery pack. There are no user-serviceable parts inside it.

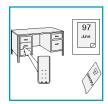

DO NOT drop the batteries or subject them to physical shocks.

Keep the battery out of the reach of children.

If the battery is not used for a long period of time (about a half year), its service life may be reduced. Store it in a cool, dry place.

Inserting Your Subscription Card

Before you can make a call on your mobile phone, you must insert a subscription card (SIM card). You are given this card (1/2 in. by 1 in.) when you take out your subscription with a network operator. For more details about the SIM card, refer to the glossary on page 82.

* NEVER touch the gold contacts on the chip, as you may damage the SIM card.

â

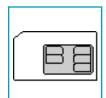

- If you do not insert the SIM card, the Check Card message is displayed when you switch the phone on.
- You can make emergency calls while you have inserted a SIM card.
 - (Some networks don't require a SIM card for emergency calls. Check with your Air Time Provider.)
- u If you wish to block access to the phone registers stored in the SIM card, see page 49.

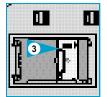

Inserting Your Subscription Card (cont.)

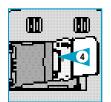

- 1 Remove the battery pack (see page 17).
- **2** Turn the phone face down with the antenna pointing downwards.
- 3 Slide the metallic SIM card lock in the direction of the OPEN arrow and lift up the holder.

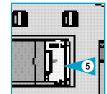

- u The gold-coloured chip should touch the contacts on the phone when the holder is closed
- The cut corner should be towards the bottom of the phone
- 5 With the metallic SIM card lock in the OPEN position, push the holder back against the phone and slide the metallic SIM card lock in the direction of the LOCK arrow, until it locks into position.
- **6** Replace the battery pack (see page 17).
- Normally you cannot insert the SIM card in the wrong position, as you will not be able to close the holder. If you cannot close the holder, check that:
 - The card is in the correct position
 - u The metallic SIM card lock is in the OPEN position

Battery Types

Your cellular phone is supplied with a slim rechargeable battery. In addition, you can also use a light and/or a long battery (options).

The three batteries have different capacities:

- u Slim battery: lasts as long as the light battery but is heavier
- u Light battery: lasts as long as the slim battery but is lighter
- u Long battery: lasts longer than the other two

Operation Times

If Low Battery is displayed and you hear a warning beep whilst on the phone, finish your call immediately. Otherwise, the phone may switch off.

Battery Type	Talk Time	Standby Time
Slim battery	1 hour 50 min.	30 hours
Light battery		30 Hours
Long battery	3 hours 40 min	60 hours

Charging Times

When **Low Battery** is displayed, charge the battery pack or replace it with a fully charged battery pack.

	Quick Charge	Normal Charge
Battery Type	TA DTC CLA Front	DTC Rear
Slim	2 hours	5 hours
Light	1 hour 30 min.	4 hours
Long	3 hours	9 hours

TA = Travel Adapter

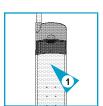

DTC = Desktop Charger (option)

CLA = Cigarette Lighter Adapter (option)

Attaching and Removing the Battery Pack

You must replace or charge the battery pack on the rear of the phone when the "Low Battery" message is displayed and you hear a warning beep.

1 To reattach the battery pack after charging, align it with the phone 1/2 inch away from the battery release button, the battery charge contacts pointing downwards.

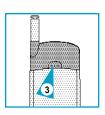

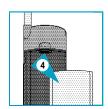

2 Slide the battery pack upwards until it clicks firmly into position.

- u Holding down the button on the rear of the phone
- Sliding the battery pack downwards about 1/2 inch
- 4 Lift the battery pack away from the phone.

Charging a Battery Pack

You are supplied with a battery charger that must be plugged into an appropriate wall socket (230V~50Hz). For more details about charging times, see page 16.

- The battery pack may become warm during charging. See pages 12 and 13 for various safety precautions to be taken with the battery pack.
- When the battery is discharged, and Low **Battery** are displayed. Refer to the table in Step 3.

- 1 Plug the travel adapter into the bottom of the handset.
- 2 Plug the travel adapter into an appropriate wall socket.

Result: u Charging begins

The battery status indicator blinks

You can use the phone while charging the battery pack. However, the charge time will be longer.

Refer to the table below when checking the battery status.

Indication	Battery Status	
008	Discharged 1/3 full 2/3 full Fully charged	

- 4 Unplug the adapter from the phone by:
 - u Pressing the two buttons on the sides of the adapter plug
 - u Pulling the plug

Switching the Phone On and Off

A mobile phone can only place and receive calls when it is switched on.

1 Switch the phone on by pressing for at least two seconds.

Result: u The phone gives a long beep

> u The greeting message is displayed

The phone scans for vour home network: when the network name and **MENU** are displayed, you can place and receive calls

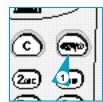

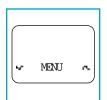

- â u If Phone Lock is displaved, enter the unlock code first (see page 55).
 - u When you switch the telephone on for the first time, Enter PIN: is displayed (see page 20).
 - u If Check Card is displayed, check that your SIM card is correctly installed (see page 15).

Result: u The phone gives a long beep

- u Power Off appears
- u The display is cleared
- u The battery is no longer being used
- To enable the phone to switch off and lock automatically (option), see page 58.

Entering Your PIN Code

The SIM card is protected by a PIN (Personal Identification Number) that you must enter the first time you use your phone or each time it is switched on, if this option is set (see page 50).

- For more details about the PIN and PUK codes, refer to the glossary on page 82.
- u If you wish to change your PIN, see page 51.

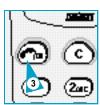

*

- If you enter the wrong PIN three times in a row, the card is blocked. To unblock your phone, you must enter the eight-digit PUK (PIN Unblocking Key) that comes with your SIM card.
- u If you enter the wrong PUK ten times in a row, your SIM card will be permanently blocked. You must then contact your network operator.

- 1 Switch the phone on by pressing for at least two seconds.
- 2 When Enter PIN: is displayed, enter your PIN.

Result: A star is displayed to represent each digit entered.

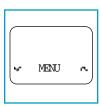

3 Press n.

â

Result: u PIN Accepted is displayed

- u Searching appears
- u The network name and •- MENU are displayed

If you entered the wrong PIN, wrong PIN is displayed, followed by Enter PIN:.
Go back to Step 2.

Extending the Antenna

If the signal received is weak (crackling and back - ground noise during a telephone conversation), you can pull out the telescopic antenna.

1 Grasp the knob on the end of the antenna and carefully pull the antenna out to its full extension.

Result: Reception quality is improved.

2 When you have finished the conversation, push the antenna gently back in.

If the signal received is sufficiently strong, you do not need to pull out the antenna.

The signal strength is indicated on the display:

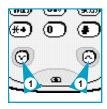

Yuul Strong signal

Selecting a Menu Option

Most of your phone's functions are selected via menus. To select a menu or sub-menu option, proceed as follows.

Result: The first menu appears.

u The appropriate numeric button Example: Press ② to select the second menu.

or by pressing:

or - as often as required

Result: The first sub-menu appears.

- **4** Select a sub-menu option by pressing:
 - Its number directly if you know it

 Example: Press ② ③ to

 select the Speak

 Volume sub-menu.

or by pressing:

- u or as often as required
- u 📶

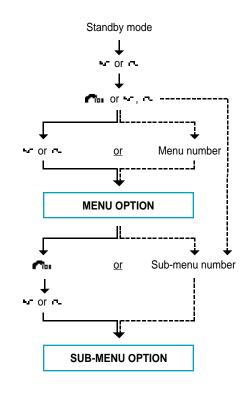

6	To exit	Press
	Each menu level one by one	as often as required.
	All menu levels	TÎ

Navigating Through the Menus

To navigate through the menus, refer to the chart below.

â

To obtain a list of all your phone's menus, refer to page 24.

---- Short-cut to menus

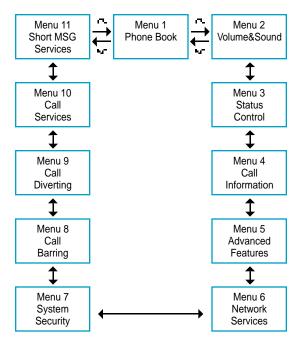

Your Phone's Menus

Your phone is set with eleven different menus. For more details on navigating through the menus, refer to page 23.

*

You cannot use the menus when you are making or answering a call.

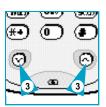

Choosing Your Language

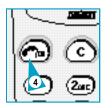

When you start using your cellular phone for the first time, you must select the language in which the various menus and indications are displayed. You can choose between Twelve languages (English, German, French, Spanish, Italian, Swedish, Danish, Finnish, Norwegian, Dutch, Portuguese and Turkish).

â The default language used by the phone is English.

- 1 Enter the menu system, as follows.
 - u Press or .
 - Result: Menu OK? is displayed.
 - u Press n.
 - Result: The first menu appears.
- 2 Press **1** to access the Language sub-menu status.
- 3 Scroll through the various languages by pressing or •.
- 4 When the required language is displayed, press r. .
 - Result: u The phone switches to Standby mode
 - u From now on, all the menus will be displayed in the language selected

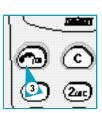

Placing a Call

You can only place a call when a network is displayed.

Tel Number: +8225413000

Connected 00:05 1 Type in the required telephone number, including the area code.

Result: The number entered is displayed.

To place an international call, insert a "+" before the international code by pressing ** for more than one second.

Example: + 82 2 541 3000.

- 2 If you make a mistake:
 - u Press © one or more times until the incorrect digit is cleared
 - u Continue typing your number
 - **â** To clear the whole number, press c for more than one second.

Result: u The number is dialled

u Calling is displayed

4 Hold the phone up to your ear and wait until the call is answered.

Result: When your call is answered:

- u Connected appears
- u The call timer records the length of the call (if this option is set; see page 58)

Placing a Call (cont.)

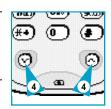

- 4 (cont.)
 - A You can adjust the earpiece volume during a conversation by pressing or -.
- 5 If reception is poor (crackling or background noise during the conversation), carefully pull the antenna out to its full extension. If you are inside a building, you can also try moving nearer a window.
- 6 When you have finished, press
 - Result: u Call Ended appears
 - u Your number is stored in the Redial memory (see page 39 for further details on this function)
- 7 If you do not wish to receive calls, switch the phone off by pressing

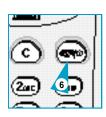

You can:

- u Display the length of the call while phoning
- u Specify that the phone must beep after each minute while you are on the phone

For further details on these functions, see page 58.

Receiving a Call

You can only receive a call when the phone is in Standby mode. When a call is received:

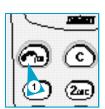

u Your phone rings (if this option is set; see page 32) u "Called" is displayed

â

If your phone was set to the silent ring mode (Ring Alert OFF), the call indicator and display backlight flash when a call is received.

- 1 To answer a call, press 📭 .
- **2** Hold the phone up to your ear and converse normally.
 - **â** You can adjust the earpiece volume during a conversation by pressing -- or --

Receiving a Call (cont.)

3 If reception is poor (crackling or background noise during the conversation), carefully pull the antenna out to its full extension. If you are inside a building, you can also try moving nearer a window.

4 When you have finished, press

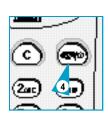

You can:

- Specify the number of rings before a call is answered automatically
- u Answer a call by pressing any button (except •••)

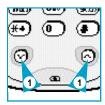

You must always use the button when you switch the phone off.

Viewing Information about Calls

You can view useful information about your calls.

Example: You wish to know the length of a call that you have just made to evaluate its cost.

Menu 4.2

Last Call

1 Press © for a while during a telephone conversation.

Result: Mute and the time spent in the mute mode are displayed (if the Call Timer option is on; see page 58).

a Your correspondent can no longer hear you, but you can hear your correspondent.

2 Press for a while again when you wish to resume the conversation with your correspondent.

Result: The Mute message disappears.

Displaying Your Own Telephone Number

The availability of this service depends on your SIM card.

Press:

u or

. .

Result: Your own telephone number is displayed.

You can only display your own telephone number when the phone is not engaged.

Automatic Redialling

Your mobile phone is equipped with an Automatic redialling function that will redial a number ten times if the call is not successful.

Calling

+8225413000

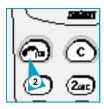

1 Type in the required number, including the area code.

Result: The number entered is displayed.

2 When you have entered the whole number, press 🙉 .

Result: If your correspondent's phone is engaged, your phone:

- u Displays User Busy
- u Returns to Standby mode
- u Redials the number automatically after about ten seconds

â

Automatic redialling stops:

- After ten attempts
- If you receive a call
- If you press 🗫

To activate or deactivate this function, see page 58.

Redialling One of the Last Ten Numbers

Your mobile phone automatically stores the last ten numbers dialled in memory. You can thus call back one or more of your last ten correspondents, without having to redial the number.

- 1 When:
- u Your phone is in Standby mode or
 - No number is displayed

press 📶 .

Result: The last number dialled is displayed.

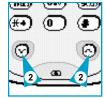

Result: The required number is automatically redialled.

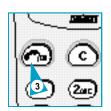

18

- u If you are using your phone for the first time or have reset it, **Redial No. Nothing** is displayed.
- u Always use the On-Off button (*****) when switching the phone off.

Storing a Number in Memory

You can store the numbers that you dial most frequently in memory, so that you do not have to enter them each time.

According to your SIM card, 1 to 99 numbers can be stored in separate memory registers, each containing up to 20 digits.

Enter Tel: 086519412532

1 Enter the menu system, as follows.

u Press or .

Result: Menu OK? is displayed.

u Press 📶 .

Result: The first menu appears.

2 Press ① ①

Result: Enter Tel: is displayed.

Enter Name: Smith **3** Enter the telephone number to be stored in memory.

You can enter up to 20 digits.

4 Press 📶 .

Result: Enter Name: appears.

5 Enter the name (up to 10 characters) to be stored with the number.

To enter letters on the keypad, press the corresponding button as many times as required in quick succession. Then, the phone automatically moves on to the next position. Refer to the table below.

Dialling a Stored Number

Once you have stored your most common telephone numbers in memory, you can dial them whenever you want.

02

Smith

18

086519412532

 Press the number of the memory register containing the number to be dialled.

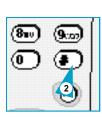

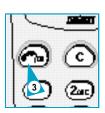

Result: The following indications are displayed:

- u Name
- Memory location number
- u Telephone number

Result: The telephone number stored is dialled.

Using Speed Dialling

Memory registers 1 to 9 are special speed dialling registers. You can dial the corresponding number, simply by pressing one button.

Hold down the button corresponding to the speed dialling number to be dialled for at least two seconds.

Result: The number is automatically dialled.

These registers are particularly useful if you wish to store emergency numbers.

Examples:

- Fire brigade, ambulance or breakdown service
- Your home number for elderly relatives

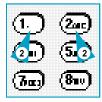

Calling 123456789012 34

Scanning the Names in Memory

If you do not remember which telephone number has been stored in which register, you can scan through the <u>names</u> until you find the one for which you are looking.

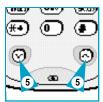

- 1 Enter the menu system, as follows.
- - Result: The first menu appears.
- 2 Press ① ② to access the Name: sub-menu option.

3 Enter all or part of the name to be found.

Example: To scan all names beginning with the letter B, enter B.

- â u To enter letters, see page 40.
 - u To correct a letter entered, press c the required number of times.

4 Press 📶 .

Result: The first name starting with B is displayed.

â If no register corresponds to the name that you have entered, Not Found appears.

- **5** Display the name required by pressing or —.
- 6 Press to make the call or to exit the function.

Scanning the Locations in Memory

If you do not remember which telephone number has been stored in which register, you can scan through the <u>memory registers</u> until you find the one for which you are looking.

- 1 Enter the menu system, as follows.
- 2 Press ① ③ to access the Location: Sub-menu option.

Result: The name, memory location and associated phone number are displayed.

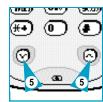

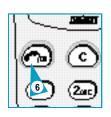

6 When you have found the required number, proceed as follows.

То	Press
Make the call	Co.
Exit the function	••• •••••••••••••••••••••••••••••••••

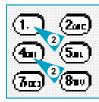

Clearing a Register by its Name

If you stored a telephone number and associated name but no longer want to keep them, you can scan for the name and clear the corresponding register.

1 Enter the menu system, as follows.

u Press or ...

Result: Menu OK? is displayed.

u Press 📶 .

Result: The first menu appears.

2 Press 1 4 to access the Name: sub-menu option.

3 Enter all or part of the name to be found.

Example: To scan all the names beginning with the letter B, enter B.

4 Press n.

Result: The phone displays the name entered and the associated phone number.

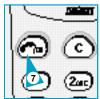

â If no register corresponds to the name that you have entered, Not Found appears.

5 Display the register required by pressing — or —.

Result: Clear? is displayed.

Clear?

7 Press number and name.

Result: u Cleared is displayed

u The phone switches to Standby mode

Clearing a Register by its Location

If you stored a telephone number and associated memory location but no longer want to keep them, you can scan for the location and clear the corresponding register.

- 1 Enter the menu system, as follows.
 - u Press or or . Result: Menu OK? is displayed.

u Press 💏 .

Result: The first menu appears.

Searching for a Network Automatically

If you wish to use your cellular phone abroad and have modified your network list, you must select a foreign GSM network. You can only select a GSM network cooperating with your home network (see your network operator to obtain a list). The phone can reach other networks for emergency calls only (see page 14). In automatic mode, the phone selects:

- u Your home network first
- u The first network in your network list if the home network is not available (see page 64), then the other ones in turn

Network Mode

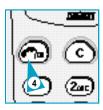

Auto

- 1 Enter the menu system, as follows.
 - u Press or .
 - Result: Menu OK? is displayed.
 u Press ...
 - Result: The first menu appears.
- 2 Press **(5) (1)** to display the **Network Mode** Sub-menu status.
- 3 Select Auto by pressing -- or --.

Result: The phone:

- u Scans for the first available network (home network, first one declared in the network list and so on)
- Switches to Standby mode

If neither your home network nor any of those declared in the network list are available, the phone then automatically tries to register to another one cooperating with your home network.

Searching for a Network Manually

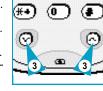

The manual search allows you to select your home network only.

â

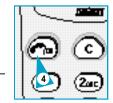

If you wish to select a network other than your home network, see the page opposite.

- 1 Enter the menu system, as follows.
 - u Press or .
 - Result: Menu OK? is displayed.
 - u Press 📶 .

Result: The first menu appears.

- 2 Press 6 1 to display the Network Mode sub-menu status.
- 3 Press or to select Manual.
- 4 Press 📶 .
 - â If you wish to search for and select a network from the network list, follow the steps below.
- Network Mode Manual
- 5 Press ③ to select the network. Result: The following indications are displayed:
 - u Please Wait
 - The network name
- **6** Press or until the required network name is displayed.

- 7 Press 📶 .
 - Result: u Searching is displayed.
 - u The phone switches to Standby mode and the selected network name is displayed.

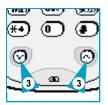

Editing a Network List

You can draw up a list (in order of priority) of the networks to be chosen automatically if your home network is not available.

â

The number of networks that can be stored in the list depends on your SIM card.

1 Enter the menu system, as follows.

u Press or .

Result: Menu OK? is displayed.

u Press 📶 .

Result: The first menu appears.

2 Press (5) (2) to display the first network in the list.

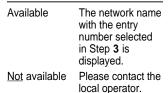

- 3 Select the entry in which the network is to be declared by pressing or —.
 - **â** The number of possible entries depends on your SIM card.
- 4 Press no for two seconds.

Result: The available networks appear.

message tone	Long Tone.
	Message Tone None.

Cleaning Your Mobile Phone

There are no specific cleaning requirements for your mobile phone.

 Use only a dry cloth to clean your mobile phone.
 Do not allow water to get into it, particularly the battery.

2 Do not use abrasive powders or sponges or any solvents, such as trichlorethylene or acetone, as they may damage the plastic surfaces.

3 If the battery or charger terminals become stained or rusty, clean them with a soft cloth.

Problems and Solutions

Before contacting the after-sales service, perform the following simple checks. They may save you the time and expense of an unnecessary service call.

When you switch your phone on, the following messages appear:

Check Card

u Check that the SIM card is correctly installed.

Phone Lock

u The automatic locking function has been enabled. You need to enter the unlock code before you can use the phone.

Enter PIN:

- You are using your phone for the first time. You must enter the Personal Identification Number supplied with the SIM card.
- The option requiring that the PIN be entered each time the phone is switched on was enabled. You must enter your PIN and then disable this option if so required.

Enter PUK:

u The PIN code was entered wrongly three times in succession and the phone is now blocked. Enter the PUK supplied by your network operator.

Memory Blocked Or SIM Memory Blocked

- You cannot store any Phone Book information or change its status.
- u If you wish to access the Phone Book and Status Control features, switch off the memory block and SIM memory block features.

"No service" is displayed

- The network connection was lost. You may be in a weak reception area (in a tunnel or surrounded by buildings). Move and try again.
- You are trying to access an option for which you have not taken out a subscription with your network operator. Contact your operator for further details.

You have entered a number but it was not dialled

- u Have you pressed the ₱ button?
- u Are you accessing the right cellular network?
- You may have set an outgoing call barring option.

Problems and Solutions (cont.)

Your correspondent cannot reach you

- u Is your phone switched on (pressed for more than one second)?
- u Are you accessing the right cellular network?
- You may have set an incoming call barring option.

Your correspondent cannot hear you speaking

- Have you switched off the microphone (Mute appears)?
- u Are you holding the phone close enough to your mouth? The microphone is located in the bottom centre of the phone.

The phone starts beeping and "Low Battery" flashes in the display

- u The battery pack is insufficiently charged. Replace the pack and recharge it for:
 - One and a half hours for the light battery
 - Two hours for the slim battery
 - Three hours for the long battery

The audio quality of the call is poor

- u Check the signal strength indicator in the display (平); the number of bars after it indicates the signal strength from strong (如此) to weak (山).
- Try extending the antenna, moving the phone slightly or moving closer to a window if you are in a building.

No number is dialled when you recall a memory register

- u Check that the numbers have been stored correctly, by using the Memory scan feature.
- u Re-store them in memory, if necessary.

If the above guidelines do not enable you to solve the problem, take a note of:

- u The model and serial numbers of your phone
- u Your warranty details
- u A clear description of the problem

Then contact your local dealer or SAMSUNG after-sales service.

Glossary of Terms

To help you understand the main technical terms and abbreviations used in this booklet and take full advantage of the features on your mobile phone, here are a few definitions.

GSM (Global System for Mobile Communication)

International standard for cellular communication, guaranteeing compatibility between the various network operators. GSM covers most European countries and many other parts of the world.

SIM (Subscriber Identification Module)

Card containing a chip with all the information required to operate the phone (network and memory information, as well as the subscriber's personal data). The SIM card fits into a small slot on the back of the phone and is protected by the battery pack.

PIN (Personal Identification Number)

Security code that protects the phone against unauthorised use. The PIN is supplied by the network operator with the SIM card. It may be a four to eight-digit number and can be changed as required.

PUK (PIN Unblocking Key)

Security code used to unlock the phone when an incorrect PIN has been entered three times in a succession. The eight-digit number is supplied by the network operator with the SIM card.

Phone Unlock Code

Security code used to unlock the phone when you have selected the option to lock it automatically each time it switches on. This is an eight-digit code that you can change whenever you want.

Function Code

Security code used to reset the Call timer and Customised setting options to their factory default settings. This is a six-digit code that you can change whenever you want.

Glossary of Terms (cont.)

SMS (Short Message Service)

Network service sending and receiving messages to and from another subscriber without having to speak to the correspondent. The message created or received (up to 160 characters) can be displayed, received, edited or sent.

THIS APPLIANCE IS MANUFACTURED BY:
