Emergency Services and Safety Precautions

Emergency Services

To make an emergency call in any country

Ask the operator for the service which you require: Police, Ambulance, Fire Brigade, Coastguard or Mountain Rescue Services. Give your position and, if possible, remain stationary to maintain ohone contact.

The 112 emergency number service is available on every digital network service. The number 999 is an alternative emergency number for the UK only, and can only be used with a valid SIM card.

Due to the nature of the cellular system, the success of emergency calls cannot be quaranteed.

General Care

A cellphone contains delicate electronic circuitry, magnets, and battery systems. You should treat it with care and give particular attention to the following points.

- Do not allow the phone or its accessories to come into contact with liquid or moisture at any time.
- Do not place anything in the folded phone.
- Do not expose your phone to extreme high or low temperatures.
- Do not expose your phone to naked flame, cigars or cigarettes.
- Do not paint your phone.
- Do not drop or subject your phone to rough treatment.
- Do not place the phone alongside computer disks, credit cards, travel cards and other magnetic media. The information contained on disks or cards may be affected by the phone.
- Do not leave the phone or the battery in places where the temperature could exceed 60°C; e.g. on a car dashboard or on a window sill, behind glass in direct sunlight, etc.
- or on a window sill, behind glass in direct sunlight, etc.
 Do not remove the phone's battery while the phone is switched on.
- Take care not to allow metal objects, such as coins or key rings, to contact or short-circuit the battery terminals.
- Do not dispose of battery packs in a fire. Your phone's Liion batteries may be safely disposed of at Li-ion recycling points. For more specific battery and power supply information. see page 3.

- Do not put your phone's battery in your mouth as battery electrolytes may be toxic if swallowed.
- Do not attempt to dismantle the phone or any of its accessories.
- This equipment is fitted with an internal battery that can only be replaced by a qualified service engineer. There is a risk of explosion if the battery is replaced by an incorrect type. Dispose of the used battery in accordance with the manufacturer's instructions.
- Using any battery pack, AC adapter or Vehicle power adapter (option) not specified by the manufacturer for use with this phone creates a potential safety hazard.
- The earpiece may become warm during normal use and the unit itself may become warm during charging.
- Use a damp or anti-static cloth to clean the phone. Do NOT use a dry cloth or electrostatically charged cloth. Do not use chemical or abrasive cleaners as these could damage the case.
- Remember to recycle: the cardboard packaging supplied with this phone is ideal for recycling.
- Do not leave the battery pack empty or disconnected for a long time, otherwise some data may be initialized.
- Your phone contains metal which may cause you an itch, a rash or eczema depending on your constitution or physical condition.
- Take care not to put your phone in the back pocket of your trousers or skirt and then sit on it. Also, do not put your phone at the bottom of bag where it may subject to excessive weight or pressure.

Doing so may damage the LCD and camera lens and cause them malfunction.

- Take care not to hold the Light too close to your or other people's eves when the Light is lit.
- Do not aim or direct the InfraRed (IR) data port towards your or other people's eyes when using the IR data exchange.
- The foam covers the earpiece of the headset (option). Do not put any other part of the headset in your ears.

Aircraft Safety

- Switch off your phone and remove its battery when inside or near aircraft. The use of cellphones in aircraft is illegal. It may be dangerous to the operation of the aircraft and it may disrupt the cellular network. Failure to observe this instruction may lead to suspension or denial of cellphone service to the offender, or legal action, or both.
- Do not use your phone on the ground without the permission of the ground crew.

Hospital Safety

 Switch off your phone in areas where the use of cellphones is prohibited. Follow the instructions given by the respective medical facility regarding the use of cellphones on their premises.

General Safety

- Observe 'Turn off 2-way radio' signs, such as those near stores of fuel, chemicals or explosives.
- Do not allow children to play with the phone, charger or batteries.
- Small parts are included in your phone. Keep them out of reach of small children, for whom it could be a choking hazard.
- The operation of some medical electronic devices, such as hearing aids and pacemakers, may be affected if a cellphone is used next to them. Observe any warning signs and manufacturer's recommendations.
- If you have a weak heart, you should take extra precautions when setting functions such as the Vibrator and Ringer volume functions for incoming calls.
- If you set the Vibrator setting to anything other than OFF, be careful that the phone is not near a source of heat (e.g. a heater) and that it does not fall from a desk due to the vibration.

Road Safety

- You MUST exercise proper control of your vehicle at all times. Give full attention to driving.
- Observe all the recommendations contained in your local traffic safety documentation.
- Pull off the road and park before making or answering a call if driving conditions so require.
- You MUST NOT stop on the hard shoulder of a motorway to answer or make a call, except in an emergency.
- Switch off your phone at a refuelling point, such as a petrol station, even if you are not refuelling your own car.
- Do not store or carry flammable or explosive materials in the same compartment where a radio transmitter, such as a cellphone, is placed.
- Electronic vehicle systems, such as anti-lock brakes, speed control and fuel injection systems are not normally affected by radio transmissions. The manufacturer of such equipment can advise if it is adequately shielded from radio transmissions. If you suspect vehicle problems caused by radio transmissions, consult your dealer and do not switch on your phone until it has been checked by qualified approved installers.

Vehicles Equipped with an Air Bag

An air bag inflates with great force. Do not place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Third Party Equipment

The use of third party equipment, cables or accessories, not made or authorized by NEC, may invalidate the warranty of your cellphone and also adversely affect the phone's operation. For example use only the NEC mains cable supplied with the AC charger.

Service

The cellphone, batteries and charger contain no userserviceable parts. We recommend that your NEC cellphone is serviced or repaired by an NEC authorized service centre. Please contact your Service Provider or NEC for advice.

Non-Ionizing Radiations

The radio equipment shall be connected to the antenna via a non-radiating cable (e.g. coax).

The antenna shall be mounted in a position such that no part of the human body will normally rest close to any part of the antenna unless there is an intervening metallic screen, for example, the metallic roof.

Use only an antenna that has been specifically designed for your phone. Use of unauthorized antennas, modifications or attachments could damage your phone

and may violate the appropriate regulations, causing loss of performance and radio frequency (RF) energy above the recommended limits.

Efficient Use

For optimum performance with minimum power consumption, note the following:

Your phone has the internal antenna. Do not cover part
of the internal antenna of the phone with your hands. This
affects call quality, may cause the phone to operate at a
higher power level than needed and may shorten talk and
standby times.

Radio Frequency Energy

Your phone is a low-power radio transmitter and receiver. When it is turned on, it

intermittently receives and transmits radio frequency (RF) energy (radio waves). The system that handles the call controls the power level at which the phone transmits.

Exposure to Radio Frequency Energy

Your phone is designed not to exceed the limits for exposure to RF energy set by national authorities and international health agencies. * These limits are part of comprehensive guidelines and establish permitted levels of radio wave exposure for the general population. The guidelines were developed by independent scientific organizations such as ICNIRP (International Commission on Non-lonizing Radiation Protection) through periodic and thorough evaluation of scientific studies. The limits include a substantial safety margin designed to assure the safety

of all persons, regardless of age and health, and to account for any variations in measurements.

*Examples of radio frequency exposure guidelines and standards that your phone is designed to conform to:

- ICNIRP, "Guidelines for limiting exposure to time-varying electric, magnetic, and electromagnetic fields (up to 300 G Hz)-International Commission on Non-Ionizing Radiation Protection (ICNIRP)".
- Health Physics, vol. 74. pp, 494-522, April 1998.
- 99/519/EC Council Recommendation on the limitation of exposure to the general public toelectromagnetic fields 0 Hz-300 GHz, Official Journal of the European Communities, July 12,1999.
- ANSI/IEEE C95.1-1992. "Safety levels with respect to human exposure to radio frequencyelectromagnetic fields, 3kHz to 300 GHz". The Institute of Electrical and Electronics Engineers Inc., New York, 1991.
- FCC Report and Order, ET Docket 93-62, FCC 96-326, Federal Communications Commission (FCC), August 1996.
- Radio communications (Electromagnetic Radiation Human Exposure) Standard 1999, Australian Communications Authority (ACA), May 1999.

Declaration of Conformity

 This product complies with the requirements of the R&TTE Directive 1999/5/EC. The 'Declaration of Conformity' leaflet can be found within this box.

Before You Start

User's manual conventions

The instructions in this user's manual make use of the shortcuts selection except special cases.

The following markers are used throughout the user's manual to attract your attention:

- This type of paragraph will contain details of where to find information related to the topic in question.
- This type of paragraph will contain information worth noting.
- This type of paragraph will contain important information.
- This type of description will contain procedures to operate your phone.

Menu shortcuts selection

The alternative shortcuts method of selection lets you jump straight to a menu or function without highlighting an icon and scrolling through the intermediate menu options. The selection are made by pressing numbers on the keypad which relate to the displayed menu options.

The instructions in this user's manual make use of the shortcuts selection, except in special cases.

Reading the titles

Some titles in this manual contain information on how to access the functions. In these titles, **M** stands for , the numbers indicate the menu shortcut numbers (see "Overview of menu function" on page ix for details) and ... (three periods) indicate that there are more operations described in the paragraph.

Reading the procedures

"Highlight" means to use the four way navigation keys (▲▼ ◀ ▶) to move the area emphasized with different colouring.

"Select" means to highlight an item and then press ().

Procedures are written omitting the verb "press", except in some special cases.

For example. (MENU) 12 means to:

- Start from the standby screen → Press MENU to display the Main menu screen
- Press 1 to display the Settings screen → Press 2 to display the Phone modes screen

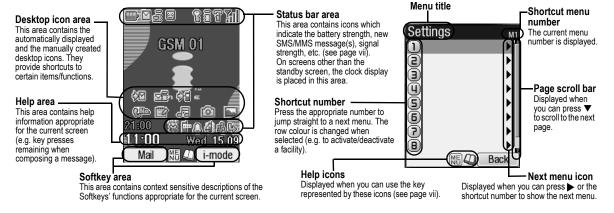

Simple procedures are connected by arrows (→).

Check box/Radio button

A check box enables/disables an option out of a set of options, and multiple check boxes can be selected at the same time. On the other hand, selecting a radio button automatically cancels the previous selection, so only one radio button can be selected at one time.

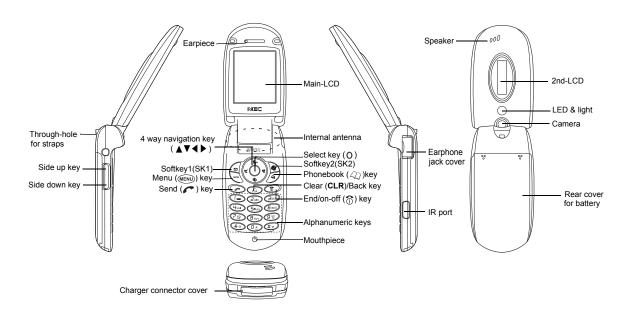

A check box/radio button option can be selected/cancelled by highlighting it and pressing ().

Display information

The Liquid Crystal Displays (LCD) on your phone are manufactured using high-precision technology. Even so, the LCD may contain pixels (dots) that fail to light or that remain permanently lit. Note that this is normal and does not indicate a problem with your display.

Parts and functions

Keypad shortcutsThe following operations are available from the standby screen.

LCD and displayed icons

Main-LCD

Indicates the battery level.

(red, green, blue) Indicates the battery charging status (fast, slow, pause).

2 🖂

Indicates that there is a new SMS in your phone.

Indicates that there is a new SMS on the network

Indicates that the SIM memory is full.

Indicates that the Inbox in your phone is full.

릚 (green)

Indicates that there is a mail on the server

Indicates that there is an MMS on the server.

Indicates that there are mail and MMS on the server.

(orange)

Indicates that there is a new mail/MMS in your phone.

This orange icon blinks while a mail/MMS is being downloaded

Indicates that the memory for mail/MMS is full.

(red, green/red, green) Indicates that new voice mail messages are on the network (No ALS/ALS Line 1/2).

6

Indicates secured communication on SSI

Indicates that GPRS is active for purposes other than i-mode connections

(gray)

Indicates that the phone is in the GSM (Global System for Mobile communication) network service area and GPRS is active.

景 (yellow)

Indicates that the GPRS is available and i-mode is active.

뢑

Indicates that the i-mode connection is carried out

뺭

Indicates that the i-mode lock is on.

No icon appears when the phone is outside the GSM network service area, or when the phone is in the GSM network service area and GPRS is not attached.

8 প্ল

Indicates the line status (ALS line 1/2 no ALS). The icon with so displayed in red indicates that the ALS line 1 or 2 is unencrypted/no ALS.

Indicates the signal strength level.

Ys:

Appears when you are outside the service area.

10 Network name (indicated in orange when using roaming service)

11 Desktop icons

See "Desktop icons" on page 19 for details.

mode

Indicates the call diversion is set.

Indicates the Meeting mode, Pocket mode, Car

No icon appears for the Normal mode.

Indicates alarm-on, sound-off, vibrator-on, soundoff/vibrator-on.

다...

Indicates the IR modem is set to on, the auto start of a Java™ application has failed.

13 Date

14 Day of week

15 Remote time

16 Local time

Indicates that you can use the options menu by pressing MENU

0

Indicates that you can use the phonebook list by pressing Q_1 .

40)

Indicates the usable keys in black, while a Java™ application is in operation.

Indicates that the help display is available when using SIM toolkit

Indicates that a Java[™] application is in operation.

<When the camera/video view finder is in</p> operation>

停留得得 Indicates single/burst mode (camera).

Indicates the video mode is on or the video is recording.

Indicates that the self timer is on

Indicates the quality of the picture (super fine, fine, normal, economy or super economy).

Indicates the quality of the video.

Indicates the shooting environment.

<When the video preview is in operation>

Indicates the track information of the video (the video file only, the video and audio file, or the audio file only).

Indicates the video is played in normal/enlarged screen size

Displays the current volume level. The 0 is mute and 9 is the maximum.

2nd-LCD

Indicates the battery level.

Indicates the battery charging status (fast, slow, pause).

2

Indicates that there is a new SMS on the network.

Indicates that the SIM memory is full.

Indicates that the Inbox in your phone is full.

3 (green)

Indicates that there is a mail on the server.

(blue)

Indicates that there is an MMS on the server.

a (pink)

Indicates that there are mail and MMS on the server.

(orange)

Indicates that there is a new mail/MMS in your phone.

Indicates that the memory for a mail/MMS is full.

(red, green/red, green)

Indicates that a new voice mail message is on the network (No ALS/ALS Line 1/2).

5

Indicates that the alarm is set.

6 {||{}

Indicates that the vibrator is set.

Indicates that the phone is in the Meeting mode, Pocket mode. Car mode.

No icon appears for the Normal mode.

8 7 7 7 71 711

Indicates the signal strength level.

Appears when you are outside the service area.

<When 2nd-LCD is used as the camera view finder</p> screen>

The left image is when the phone is folded. and the right image is when the phone is open.

9 2.49

Indicates single or burst mode of the camera.

Indicates that the video mode.

Indicates the video is recording.

10 ල

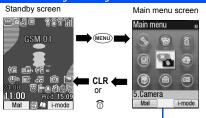

Indicates that the self timer is on.

Indicates the photo/video screen size.

Indicates the battery level.

Overview of menu function

The Main menu has a set of icons for its top levels of options (examples of the top level are shown right) which can be selected either using a combination of the 4-way navigation key ($\triangle \nabla \blacktriangleleft \triangleright$) and \bigcirc (menu selection), or just the keypad (shortcuts selection).

- The title of the selected option will be displayed in the Help area.
- SIM toolkit icon is displayed only when your SIM card supports this function.
- With the Main menu screen displayed, press **0** to display your own number.

Getting Started

Preparing the phone

Before trying to use your phone, make sure that a valid Subscriber Identity Module (SIM) card is inserted and the battery is charged.

SIM card

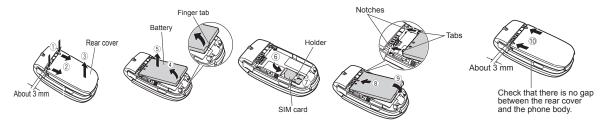

Before using your phone, you must sign-up with one of the digital network service providers. In addition to your subscription details you will receive a personal SIM (Subscriber Identity Module) card which is inserted into your phone.

If the SIM card is removed, the phone becomes unusable until a valid SIM card is fitted. It is possible to transfer your SIM card to another compatible phone and resume your network subscription. The screen on your phone will display appropriate messages if no SIM card is fitted.

- 🥦 If the phone, or the SIM card, is lost or stolen then you should contact your service provider immediately in order to bar it from use.
- The phone supports a number of languages and the keyboard symbols have been chosen for world-wide operation.
- The digital technology of your phone helps to ensure that your conversations are kept secure.
- The SIM card contains personal data such as your electronic phonebook, messages (see "Message (M2)" on page 27) and also details of the network services you have subscribed to. The phone will not work (except for emergency calls on some networks) unless a valid SIM card is fitted.
- 🤍 Be sure to turn the phone off before inserting and removing a SIM card. Otherwise damage to the SIM card can occur.

Inserting a SIM card

- Be sure to turn the phone off before removing the battery pack.
 - While pressing down the areas marked with °o of the rear cover as indicated by arrows ①, slide the rear cover about 3 mm in the direction of arrows ② with your finger tips. Then, lift the cover up in the direction of arrow ③ to remove it.
 - Third the finger tab of the battery pack up in the direction of arrow . Then lift the battery pack out in the direction of arrow .
 - With the metal part facing down, insert the straight end of the SIM card under the holder in the direction of arrow . Slide the SIM card all the way until it reaches the end.
 - Align the ⊕ ⊕ marks on the battery pack with the ⊕ ⊕ marks on the phone. Insert it into the cavity in the phone body in the direction of arrow ®, making sure that the tabs on the battery pack fit properly into the notches in the phone. Then, press the battery pack down in the direction of arrow ® to clip it into the phone.
 - Make sure that the battery pack is securely attached to the phone and align the rear cover with the grooves on the phone so that there is a gap of about 3 mm at the end of the cover. After making sure that there is no gap between the rear cover and the phone body, slide the rear cover in the direction of arrows ® until you hear a click.

- 뿻 If the SIM card is not fully inserted when the battery is replaced, damage to the SIM card can occur.
- If the SIM card is already fitted, see "Start-up" on page 4.

Removing a SIM card

With the battery removed, push the short and straight end of the SIM card with your thumb to slide it gently in the direction of arrow ② → Lift the SIM card after it is completely removed from the holder.

Charging the battery

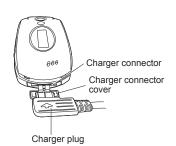

Before trying to use your phone, insert the phone's battery, connect the NEC battery charger (AC adapter) supplied with your phone to a suitable mains power socket.

- Pull open the charger connector cover gently.
- Be careful when handling the charger connector cover. Do not pull strongly.
- Connect the charger plug (AC adapter) into the charger connector at the bottom of the phone. If your phone is turned on and charging starts, the battery charging icon will be displayed. LED will turn on in red while charging. When charging is complete, the LED will turn off.
- You are recommended to switch off the phone while charging. If you need to receive calls, your phone can be switched on and left in standby while being charged, although the total time taken to charge is then increased.

The colour on the display shows the charging status of battery.

- Using any battery pack, AC adapter, vehicle power adapter (option) not specified by NEC for use with this phone can be dangerous and may invalidate any warranty and approval given to the cellphone. Do not leave the charger connected to the mains supply when it is not in use.
- Do not try to charge the battery if the ambient temperature is below 5°C (41°F) or above 35°C (95°F).

🤎 DO NOT connect a charger or any other external DC source until the phone's battery is inserted.

- If the phone does not respond, please wait for a few minutes. The charging will then start.
- If you use the phone while charging, handle the phone carefully since the cable or adapter is connected.
- If you make/receive a call while charging, the charging may temporarily be interrupted.
- Charging takes approximately 3 hours with your phone turned off.
- Even if the phone remains connected to the charger, battery residual capacity may decrease when the phone is used for video recording, playing or other battery consuming operation.

IMPORTANT BATTERY CHARGING INFORMATION

Charging a very low battery

The battery's charge continues to drop after the low battery warning is displayed. In extreme cases where the battery is left uncharged for some considerable time after this warning, a trickle charge is used to slowly top-up the battery to the safe level at which the fast charging can begin. The phone can be in trickle charge for a few minutes before the fast charging starts.

Standby and talk times

Your phone works closely with the network you are using to provide the services you need, and the standby and talk times achieved will depend on how you use the phone and choices made by the network operator.

In particular, factors such as your location within the network, the frequency at which this location is updated, the type of SIM card you have, your reception of area messages or cell broadcast messages and the use of full rate or enhanced full rate speech, will affect both standby and talk times.

Checking the battery

Check icon at the top of the	e standby screen.
------------------------------	-------------------

The block on the display shows the charge of your battery pack.

📟 Full battery power 📖	Partial battery power	Low battery power	Battery	empty
------------------------	-----------------------	-------------------	---------	-------

Low battery alarm

When the battery voltage falls below the working level, a low battery warning is displayed on the screen accompanied by LED illumination and a short tone along with an empty battery icon. The phone will automatically power down shortly afterwards.

Please charge the battery as much as possible when the battery is very low.

Other battery alarms

Your phone may display warnings when the battery temperature is too high, or the voltage of the battery or the charger is over the appropriate level. Follow the instruction given by these warnings immediately.

Attaching and Removing the Emblem

Attaching the emblem

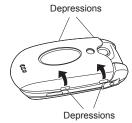

Attach the emblem, aligning the holes to fit the 2nd-LCD, LED and camera.

Make sure the emblem is fitted over the square depressions on each side of the phone.

Removing the emblem

Remove the emblem by hooking your finger tips near the square depressions and lifting in the direction of the arrows. You can also remove the emblem from the other side of the phone.

Start-up

Switching the phone on

- Hold down of for about a second to switch on. The screen will display the selected greeting (see page 23) and the phone is then in standby.
- You may need to charge the battery before using your phone.
- When your phone is turned on, the specified ringer may sound.
- If your phone is accidentally turned off while downloading or deleting Java™ application, it will take longer than usual to start up the phone the next time you turn on the power.

Switching the phone off

Hold down number until the display shows the switch off message.

PIN code

The SIM card issued by your service provider has a security feature called PIN code protection. The Personal Identification Number (PIN) is a number put on to the card by your service provider, and is 4 to 8 digits long. Some service providers supply SIM cards which will cause your phone to prompt for

a PIN code when it is turned on. If this is the case, enter your code with the phone's keypad. If you insert a SIM card other than your own, information such as call logs may be lost. (See "Security (M17)" on page 24 for details.)

Basic Calls & Phone Use

Making basic calls

You make a simple call in the same way as you would with a normal phone, except that you need to press rafter entering the area Subscriber Trunk Dialling (STD) code and the phone number. To make international calls, you must first enter the international dialling code (see page 13).

- Use the full STD area code even if you are calling to a person in the same town. If the numbers are too long to be displayed within one line, after pressing , excess part is deleted and '...' is added at its end.
- The main-LCD display shows the strength of the radio signal that links your phone to the network. The maximum signal strength is shown by 4 shaded blocks and the minimum signal strength by 1 block.

Starting a call

- Key in the phone number. Check the number on the display -> r or SK1 to send the input number to start the call
- Before the other party answers the call, you can end the call by pressing for briefly, pressing SK2 or closing your phone. When you use the headset, you can also end the call by pressing and holding the button on it.

When the call is sent, the screen displays the number called or the name stored in the phonebook and a connection graphic or a Calling Line Identification (CLI) picture that has been allocated to the number called (see page 53).

Correcting mistakes

Use the ◀ and ▶ to move the cursor and then press CLR to clear individual digits, or hold down CLR to completely clear a phone number.

Ending a call

- ▶ While talking, press ♠ briefly or close your phone. The phone returns to the standby screen.
- ☐ If ⋒ is held down, your phone will turn off.
- When you use the headset, you can also end a call by pressing and holding the button on it.
- You cannot end a call by closing your phone when the headset is connected.

Receiving an incoming call

When someone calls your number, the ringer will play (if set - see page 22), the LED glows in the specified colour, and the phone number of the caller may be displayed if the calling line identification facility is available and the caller has activated the feature. If the caller's phone number has been related

and stored in your phonebook with a name and a CLI picture (see page 53), that name and picture will be displayed. If the caller has withheld their identity, the screen will give a message that the caller's number is being withheld.

You also have options for holding and forwarding calls. These options depend on your network and your subscription arrangements.

Accepting an incoming call

- While receiving an incoming call, press r or SK1.
- When you use the headset, you can also accept an incoming call by pressing the button on it.

Rejecting an incoming call

- While receiving an incoming call, press nor SK2 briefly or close your phone.
- When you use the headset, you can also reject an incoming call by pressing and holding the button on it.
- You cannot reject a call by closing your phone when the headset is connected.

If your phone receives a call and you do not answer it, the screen will display the phone number (or the name if stored) of the caller (if available). This information is stored in the missed calls list. Up to 20 missed calls are stored in this list.

- You can set your phone to answer a call when any key is pressed (see "Any key answer" on page 21).
- If you are making a call, the phone gives priority to receiving a call unless you have already pressed 🥕.
- See also: "Call diversion (M161)" on page 11 and "Call waiting and holding (M162)" on page 12.
- See also: "Call options (M43)" on page 9.

Unsuccessful calls

If dialled call is not successfully connected, the display will give an appropriate message.

If your phone has the auto redial function activated, the number will be automatically called again after a short delay (see page 12).

Emergency calls

The standard emergency number of 112 can be used.

- Key in 1 1 2 →

 or SK1 to connect the call to the local emergency services.
- On some networks, emergency calls can be made using the 112 number without a SIM card inserted.

Last number redial

You can redial the last number you called.

Ensure that the standby screen is displayed and no phone number is shown -> r twice to dial the last number you called.

See also: "Call options (M43)" on page 9.

One-touch dial

One-touch dial for the phonebook (SIM) is available by pressing and holding the number keys between 2 and 9.

- A number for the One-touch dial corresponds to the location number in the phonebook (SIM).
- One-touch dial is available only for the phone numbers with the location number 2 to 9 stored in the phonebook (SIM).

Fast dialling

Fast dialling is activated in Abbreviated Dialling Numbers (ADN) by entering a number 1 to 255 (depending on the SIM card), # and ...

Fast dialling is also activated by entering the location number 1 to 500 of your phonebook (Phone) and then * and ...

Displaying your own phone number (M0/M416)

● MENU 0 or MENU 416

Voice recall

You can store up to 10 voice recall recordings which can be allocated to a personal data stored in the phonebook (Phone). To store the voice recall sound, see page 53. To use the voice recall function, use the following procedure:

- Press and hold
- When you use the headset, you can also activate the voice recall function by pressing and holding the button on it from the standby screen.
- Within 4 seconds, say the word or words you have recorded to identify the record you wish to recall. If the word or words were recognized, the first phone number of the personal data stored in the phonebook (Phone) will be called automatically.

Options menu (during a call)

During a call, MENU to display the options menu

No.	Options menu (during a call)	
1	Main menu	Displays the Main menu screen. See "Overview of menu function" on page ix for details.
2	Hold/Retrieve	Puts the call(s) on hold or retrieves the call(s).
3	Mute/Unmute	Mutes or unmutes all active calls.

No.	Options menu (during a call) (Continued)	
4	Transfer call Enables to transfer the call and connect other parties.	
		After transferring the call, your call will be dropped.
5	Add to conference	Merges calls and makes a multi-party call.
6	Private call	Make a private call to the highlighted party within the multi-party call.
7	Record call	Records the call while talking.
8	Disconnect party	Disconnects the highlighted party.

Depending on the conditions, some options may be displayed in gray and not be available.

Putting a call on hold

To put the received or dialled call on hold, SK1 or (NENU) 2. To retrieve the call, SK1 or (NENU) 2 again.

Mute

You can mute the sound from the mouthpiece during a call. When your call is muted, the other party cannot hear any sound from your phone, but you can still hear the sound from the other party.

- To mute the sound during a call, press (MENU) 3. To retrieve the sound, press (MENU) 3 again.
- The mute function is automatically released after the call ends.

Transferring a call

When you have an active call and a held call, you can transfer the call and connect the two parties, then you can drop from the line while leaving those two calls active.

- To transfer the call, press MENU 4.
- The After dropping from the call with the other two parties, if you have a call waiting, you can proceed the call with it.
- 🥍 Call transfer facility is SIM dependent.

Multi-party calls

If your SIM card is multi-party enabled, you can make a conference call to more than one caller. You can even leave the call while the remaining participants carry on with the call.

Receiving the second call

- SK1 or

 to accept the second call → SK2 or

 MENU 5 to merge both calls.
- When you accept the second call, the first call will be put on hold.

Making the second call

SK1 to put the first call on hold → Key in the phone number → SK1 or r to make the second call → After the second participant answers, SK2 or 5 to merge both calls.

Putting the multi-party calls on hold

SK1 or **MENU** 2 to put both the first and second calls on hold → To retrieve the call, **SK1** or **MENU** 2 again.

Making a private call

While on the multi-party call, you can make a private call to a specific party.

- → Highlight the desired party you want to make a private call to → www 6 → To end the private call and return to the normal multi-party call, www 5.
- While you are on a private call, other parties can continue with their conversation.

Ending the multi-party calls

- Multi-party call facilities are network dependent.

Recording a call

You can record the conversation during the call.

During a call, press and hold ▼ or wew 7 to display the Voice memo screen → SK1 to start the recording → SK1 to pause and SK2 to stop the recording → To play the recording, see "Recording/playing voice memo or setting speaker" on page 75

Call options (M43)

From Call options, you can display the list of missed, received and dialled calls, the duration of the last call made and all calls, charge information and the redial blacklist

MENU 4 3 to display the Call options screen.

No.	Call options	
1	Missed calls	Displays the list of missed calls. You can also access this function by pressing ▶ from the standby screen.
2	Received calls	Displays the list of received calls. You can also access this function by pressing ◀ from the standby screen.

No.	Call options (Continue	ed)

Depending on the conditions, some options may be displayed in gray and not be available.

Call waiting and holding (M162)

This facility informs you that another call is being made to your phone while an existing call is in progress.

Setting up call waiting

■ MENU 162 → 11 to activate, 12 to deactivate the call waiting, or 2 to check the status of call waiting.

Using call waiting

- If you are on a call and another comes in, you will be alerted by a beep in the earpiece
 → SK1 to accept the incoming call
 - To switch the calls, SK1
 - To merge the calls, **SK2** (see "Multi-party calls" on page 8)
 - To end the current call, ?
 - To retrieve the held call SK1

Auto redial (M163)

With the auto redial facility, your phone will redial a number up to 10 times if the first attempt fails. A tone will be heard at each redial attempt. Your phone cannot connect a call if the other party is busy or if there are network problems. Pressing **SK2** during a redial attempt will abort it.

● MENU 163 → 1 to activate or 2 to deactivate the auto redial facility.

Line ID (M164)

The line ID (identification) facility is network dependent.

The line ID facility enables you to choose whether or not to send your own phone number when you make a call and also whether or not to display a caller's phone number when you receive a call.

- 164 to display the Line ID screen with a 🗸 over an activated line and a 🗴 over a deactivated line.
- To set the status of each line (see the table on the right), highlight a line (the line will flash when selected).
- SK1 to set the line identification on or off → r to save the current settings.

Line type	Setting
Outgoing	Send own #
	Show connected #
Incoming	Show Incoming #
	Return own #

International dialling codes

When you make an international call from any country, you must start by dialling a special international access code. Your phone has the facility to prefix a + symbol to the numbers, so that you need not enter the access code for the country that you are calling from.

Entering international dialling codes

→ Hold down 0. The 0 character displayed will change to a + character → Key in the country code, area code, and phone number that you wish to call.
The UK country code is always 44, no matter what country you are dialling from. For example, a typical UK number of 0131 1234567 is entered as:

Inter	national access	country code	area code	phone number
+		44	131	1234567

Roaming

You will be charged for calls forwarded to you while roaming.

The roaming facility enables you to use your phone in many parts of the world and pay all charges through your normal service provider. Your network operator usually has agreements with named networks in other countries so that automatic roaming can take place with these named networks. The phone also allows you to set network preferences of your own.

When dialling, you will need to add the international access codes if required. So, storing all numbers with the codes (such as +44 for UK) is helpful (see page 13).

Before leaving your home country, you should select any preferences such as bar calls or call diversion.

Setting Automatic or Manual network selection (M181)

- MENU 181 → 1 to select the automatic mode or 2 to select the manual mode.
- 🢖 Before you manually select a network, ensure it is covered under the agreement you have with your service provider.

New search (M182)

■ 182 to search the available networks → Highlight the desired network → ① to connect to it

Viewing/editing network list (M183)

- Before editing your network list, please consult with your service provider.
 - MENU 183 to read the network list in the SIM memory → Highlight the required network → MENU

Ī	No. SIM list Options menu			
ŀ		o. Oili ilot optiono ilicita		
ı	1	Add	dds a new network to the list.	

No.	SIM list Options menu		
2	Move Moves the highlighted network within the list.		
		Use ▲ and ▼ to move the network → SK1	
3	Remove	Deletes the highlighted network.	

Selecting the frequency band (M184)

You have to select the frequency band to suit the location.

- MENU 184 -> Select the required frequency band.
- Frequency bands must be adjusted to suit the location when roaming (Europe, US, etc.), for the phone to work properly.

Text Entry

This section describes how you enter text. The same method of text entry can be used in phonebook editing.

Mode change

With a text entry screen displayed, SK1 to change the text entry mode: T9[®] English text, Normal text (ABC), Numeric input

T9[®] English text input

Your phone incorporates T9[®] Text Input, enabling fast, easy and intuitive text input. For each letter to be keyed in, you only need to press the alphanumeric key once. The screen will display the word you may require based on the internal English dictionary of your phone.

- With a text entry screen displayed, SK1 until the entry mode is T9[®] English input.
- i) For example, to enter "Good":
 - Press 4 6 6 3, and then press 0 to confirm the word.
- ii) To enter "Peter is good":
 - Press * to shift to upper case (for one letter). You will see a green arrow in the Help area.
 - Press 7 3 8 3 7 to display "Peter", and then press 0 to confirm.
 - Press 4 7 to display "is", and then press 0 to confirm.
 - Press 4 6 6 3 to display "good", and then press 0 to confirm and the sentence is completed

Key	Function
0	Confirms a word and inserts a space.
SK1(List)	Displays the list of other matching words.

Key	Function (Continued)
SK1(Spell?)	Activates the spell mode which temporarily deactivates T9 for you to spell the word in Normal text input. The spell mode ends when you key in 0 to enter a space, or SK1(T9).
SK2(Dismiss)	Cancels the T9 matching word list.
SK2(Next) or #	Displays the next candidate.
∢ or ▶	Places the cursor.
0 to 9 (press and hold)	Inserts the number.
CLR	Deletes any character.
*	Toggles between lower case, shift (upper case for one letter) and caps lock (permanent upper case).
★ (press and hold)	Press and hold to activate the highlight mode (see "Highlight mode Options menu" on page 32 for details).
#	Activates symbol mode when no word is highlighted.

Normal text input

- With a text entry screen displayed, press **SK1** until the entry mode is Normal text (ABC) input.
- Use alphanumeric keys to enter letters. For example, to enter "e", press 3 twice; to enter "f", press 3 three times. For other functions, see the table below.

Key	Function
*	Toggles between lower case, shift (upper case for one letter) and caps lock (permanent upper case).
* (press and hold)	Press and hold to activate the highlight mode (see "Highlight mode Options menu" on page 32 for details).
0	Inserts a space.
0 to 9 (press and hold)	Inserts the number.
CLR	Deletes any character.
⋖ or ▶	Places the cursor.
#	Activates symbol mode.

- If you have made a mistake, use ▲ ▼ ◀ ▶ to place the cursor to the right of the incorrect character and then press CLR.
- When entering normal (ABC) text, and the character you require is displayed, use ▶ key to move to the next character position (if you wait for more than 1 second, the cursor will move one character to the right automatically).

Numeric input

- With a text entry screen displayed, press **SK1** until the entry mode is Numeric input.
- You can also press and hold the number key to insert the number in T9/Normal text input mode.
- Use alphanumeric keys to enter numbers.

Key allocations

Whenever you need to enter text (for short messages, storing names with numbers, etc.), successive presses of an alphanumeric key will display different characters. Pressing * in T9[®] English text input or Normal text (ABC) input toggles between lower case, shift (upper case for one letter) and caps lock (permanent upper case). When a text entry screen is displayed, pressing **SK1** enables you to select Normal text input (ABC), T9[®] Text input (T9) or Numeric input (123).

Depending on the types of text entry screens, not all types of text entry modes are available.

Symbol mode

In the symbol mode, pressing each key will input a symbol according to its position on the Symbols screen. By pressing # in a text entry mode, the Symbol screen will be displayed. Use \blacktriangle and \blacktriangledown to select the row, and then press the appropriate number on the column of the required symbol.

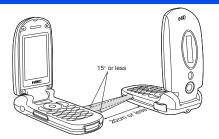

IR Data Exchange

Your phone is equipped with an InfraRed (IR) data port which enables you to send and receive phonebook/picture/video/sound excluding MP3/schedule/ToDo list/note data with cellphones or other devices equipped with IR ports.

- Do not aim or direct the IR data port towards your or other people's eyes when using IR data exchange.
- 🤍 Do not aim or direct the IR data port towards another IR device as this may cause the device to malfunction.
- Depending on the other party's cellphone or device, the data may not be received correctly.

Positioning of the phones

- Open both sending and receiving phones vertically and place them as their IR ports face each other with less than 20cm of interval.
 - Do not place anything between IR ports.
 - The angle made of two IR ports must be within 30°.
 - Do not move the phones until the data exchange is complete.
 - The phones may not communicate successfully if they are placed under direct sunlight or fluorescent light, or close to other infrared devices.
 - While sending or receiving data through IR, your phone is automatically placed out of service, so phone call, message and i-mode access are disabled.

IR send

You can send phonebook/picture/video/sound excluding MP3/schedule/ToDo list/note data as a file through the IR port.

Pefore starting to send data, the other party must be ready to receive data.

Phonebook entry (M413...)

- Pu You can only send Name, Home, Mobile, Work, Fax, 2 Email addresses and 2 pieces of descriptive information.
- Your phone sends data according to the vCard 2.1 specification.

■ MEND 8 5 → Highlight Public, Private or All → ○ → Highlight Public, Priva

Note (M862...)

● MENU 8 6 2 → Highlight a note → MENU 2 and 2→ The note entry will be sent through the IR port.

IR receive (M891)

You can standby your phone to receive data (phonebook/picture/video/sound (excluding MP3)/schedule/ToDo list/note data) from other devices or a phone of the same model.

Receiving data through IR (M891)

- MENU 8 9 1 → Start sending data from the other end.
- Donce the transmission completes, your phone automatically judges the type of received data and stores the data accordingly.
- If your phone does not have enough space to store the received data, a message will be displayed indicating lack of space. In such a case, delete unnecessary data and try the data exchange again.
- Received picture/video/sound files are stored in the Download folder of My data (see "My data (M6)" on page 61).

IR modem (M892)

You can use your phone as a modem for a PC via the IR port to establish a dial-up connection to an Internet service provider.

Activating the IR port for modem use

- MENU 892 → The phone will be in standby status for IR transmission from the external device.
- If the IR transmission is not established within a short while, the standby status will end.
- While on active call or connecting to the external device such as USB, IR modem is not available.
- Your phone consumes a lot of battery power when used as a modem. After using your phone as a modem, be sure to deactivate the modem function from your PC or press ? (for the CSD connection only). When the modem function is deactivated, the idle screen will be displayed without the Infrared icon and GPRS icon.
- Check with your service provider to use your phone as a modem to connect to the Internet.

Desktop icons

Desktop icons are shortcuts to functions or items. You can activate a desktop icon on the standby screen (desktop) in stead of following the menu and pressing the shortcut numbers.

The desktop icons are displayed in two rows on the standby screen. See "LCD and displayed icons" on page vii for the actual location of the desktop icon area

There are two types of desktop icons: the automatically displayed and the manually created.

Automatically displayed desktop icons

The following automatically displayed icons are displayed on the upper row of the desktop icon area:

Icon name	Image	Description	
Missed call Displayed when there is a new entry in the Missed calls list.		Displayed when there is a new entry in the Missed calls list.	
Missed message		Displayed when there is a new message you have not acknowledged.	
Missed Mail Displayed when there is a new Mail you have not acknowledged.		Displayed when there is a new Mail you have not acknowledged.	

You can delete all the automatically displayed icons by pressing and holding **CLR** on the standby screen.

If you turn the phone off, all the automatically displayed desktop icons are deleted.

Manually created desktop icons

The following manually created icons are displayed on the lower row of the desktop icon area:

Icon name	Image	Description
Phone number	Gur	Displays a dialer screen with the registered phone number displayed.
Message	Ľ@	Creates a new message to the registered phone number or Email address.
URL	URL	Activates the browser and accesses the registered URL.
Picture		Displays the image file.
Notepad		Displays the Notepad preview screen with the note file displayed.
Camera	0	Displays the camera view finder screen.
Video		Displays the video view finder screen.
Music player	II.	Displays the Music player screen.

Creating a desktop icon manually

- Activate the required function (camera/video/music player) or display the item (image file/note file/phone number/Email address/URL).
- to display the Options menu and select Add desktop icon (for an image/note file, this menu is under Use item, and for camera/video, under Other settings).
- You can create up to 10 desktop icons.
- If you have more than 5 desktop icons, an arrow will be displayed to indicate that you can scroll for more icons.
- The phone number, mail address or URL desktop icon data will not be updated when the original data is modified. Delete the old desktop icon and create a new one in such a case.
- When you create a desktop icon of an image file or notepad file, the data will be automatically protected. The default title will be the file name, even if this title is changed the original file name will remain the same.
- Each manually created desktop icon has a title that you can edit.

Activating a desktop icon

- → Highlight the required desktop icon → ○
- If you do not press any key for three minutes after highlighting a desktop icon, the highlight is cancelled and the screen goes back to the normal standby screen.
- If you activate an automatically displayed desktop icon, it will be deleted automatically.

Desktop icon Options menu

 → Highlight a desktop icon → MENU

No.	Desktop icon Options menu	
1	Edits the title of the highlighted desktop icon.	
2	Delete one Deletes the highlighted desktop icon.	
3	Delete all	Deletes all the manually created desktop icons.

Settings (M1)

Phone(M11)

No.	Phone				
1	Voice volume	Adj	Adjusts the sound volume output from the earpiece.		
		Use ▲ ▼, Side keys or alphanumeric keys (0 to 9) to adjust the volume.			
		B	You can also press the S	ide keys to display the volume control screen and to adjust the volume setting.	
		B	During a call, you can pre	ess the Side keys to adjust the setting of the volume as required.	
2	Answer options	1	Any key answer	On: Any key (except ♠, SK2, the Side keys) is valid to answer a call Off: Only and SK1 are valid to answer a call	
		2	Ring silencer	On: Pressing one of the Side keys stops the ringer sound and the vibrator while receiving a call with the phone closed.	
				This function cannot be used if the Side keys are locked.	
				Ŷ See also: "Mute" on page 8.	
		3	Fold answer	On: You can answer an incoming call by opening your phone.	
3	Side key	Disable: Side keys are locked while your phone is folded.			
		B	You can also lock/unlock	the Side keys by pressing and holding en on the standby screen.	
4	ALS setup	The Alternate Line Service (ALS) facility is SIM card and network dependent.			
		If yo	our SIM card supports AL	S, you can setup which line to use for Outgoing call or Voice mail.	
5	Clock	1	Show clock	Sets to display the local time, both the local and remote times or no time on the main-LCD.	
		2	Set time	Sets the time for the local or remote time.	
		3	Set date	Sets the date.	
		4	Set date format	Selects the date display format.	
		5	Set time format	Selects the time display format from 12 hour or 24 hour.	

No.	Phone (Continued)			
5	Clock (Continued)	6	Set timezone	Sets the timezone. (A ✓ is placed on the currently selected timezone.)
				☐ If the highlighted timezone has Daylight Saving, a check box will be displayed at the bottom of the screen. Press () to activate (✔)/deactivate the setting.
6	Language	Sel	Selects the language the phone displays.	
		Po	When you have switched	the language to be displayed, please wait until the new setting becomes active.
7	LED	Selects the Light Emitting Diode (LED) colour for incoming calls/SMS/Mail or during a call.		
		If the personal setting or the Group setting for the LED colour is also set in the phonebook, it has priority over this LED setting. (See "Allocating a LED colour" on page 53 for details.)		
8	Earphone type	Sel	Selects the earphone type from Stereo or Monaural, depending on your earphones (headset).	

Phone modes (M12)

Your phone can be set to one of the following modes: Normal mode, Meeting mode, Pocket mode or Car mode.

🄊 Any changes made to the settings while in a particular mode will be stored and used when that mode is selected again.

Selecting your phone mode

- You can also set the Meeting mode or return to the previous mode by pressing and holding \blacktriangle on the standby screen.

Editing the mode settings

- For any volume setting, use ▲ ▼, Side keys or alphanumeric keys (0 to 9).

No.	Phone mode setting		
1	Ringer Selects the Sound or Video for incoming calls. (See "Sounds (M62)" on page 62 or "Videos (M61)" on page 6 details.)		
2	Ringer volume	Sets the sound volume for incoming calls. While receiving a call with your phone open, the ringer volume can also be adjusted by pressing the Side keys	
3	SMS tone	Selects the ringtone for incoming SMS messages. (See "Sounds (M62)" on page 62 for details.)	

No.	Phone mode setting (Continued)			
4	SMS tone volume	Sets the sound volume for incoming SMS messages.		
5	Mail tone	Selects the ringtone for incoming Mail or MMS messages. (See "Sounds (M62)" on page 62 for details.)		
6	Mail tone volume	lail tone volume Sets the sound volume for incoming Mail or MMS messages.		
7	Key tone	Turns on/off the key tone.		
8	Service tone	Turns on/off the service tone.		
9	Alarm volume	Sets the sound volume for Clock alarm and Schedule alarm.		
0	Vibrator	Turns on/off the vibrator function.		
*	Earphone setting	Selects the sound output from Earphone & Speaker or Earphone.		
#	Auto answer	Selects whether to answer an incoming call automatically. To use the Auto answer function, connect the headset to your phone and set the earphone volume to 1 or higher. If the earphone volume is set to 0, you must turn the vibrator ON to use the Auto answer.		

lf the selected mode is Car mode, the backlight will always be turned on. This will reduce battery life.

Main-LCD (M13)

No.	Main-LCD		
1	Greetings	Selects the greeting which is displayed on the main-LCD during phone start-up from No greeting, Text or Animation.	
		If you select Text greeting, press SK1 to edit the greeting text. Key in a greeting text and press 0.	
2	Wallpaper	Selects a picture or video file to use as the background for the main-LCD.	
3	Main menu style	Selects and resets the background and icons for the Main menu screen.	
4	Colour style	Selects the phone's colour theme.	

2nd-LCD (M14)

No.	2nd-LCD			
1	Clock/Event display	Selects which items to display on the 2nd-LCD from Clock & Event, Clock only, Event only or Off.		
2	Clock orientation	Selects whether to display a horizontal clock or a vertical clock.		
		When you select to display a vertical clock, it is read from the camera and LED end.		
		The event displays and incoming call numbers are shown along the long end according to the Display direction.		
3	Incoming call No.	Turns on/off the function to display the incoming call number on 2nd-LCD.		
4	Display direction	Selects which direction to display the 2nd-LCD.		
		This setting does not effect the vertical clock.		
5	Contrast	Sets the contrast level of the 2nd-LCD.		

Power saving (M15)

If the selected mode is Car mode, this function is displayed in gray and is not available.

No.	Power saving	
1	Level setting	Selects the power saving level from Level 1 (minimum power save setting), Level 2 (moderate) or Level 3 (maximum). The main-LCD backlight will turn dim and then turn off after a given amount of time with no operation. When the phone is folded, Power saving level also applies to the 2nd-LCD.
2	Function key LED	Selects whether to flash the LED of SK1 and SK2 when the main-LCD and its backlight are turned off. If the selected mode is Car mode or the camera view finder screen is displayed, the main-LCD backlight will always be on.

Calls (M16)

Pror settings provided on the Calls screen, see "Call settings (M16)" on page 11.

Security (M17)

MENU 17

The security settings will help to protect your phone from improper and unauthorized use. You may be required to enter one of the five codes (shown below). When the phone prompts you for one of these codes, key in the appropriate number.

- PIN code (provided by your network service provider to protect your SIM card if it is stolen)
- PIN2 code (provided by your network service provider for charge information and Fixed dialling services protection)
- PUK code (personal unblocking key in case you forget PIN code)
- PUK2 code (personal unblocking key in case you forget PIN2 code)
- Security code
- 💖 If you forget any of these codes, ALWAYS contact your service provider as they are the ONLY source for your codes.

PIN code

Your phone can be set up so that your PIN code must be entered at power up before the phone can be used at all. If the PIN code is not entered, not even incoming calls can be answered. Entering your PIN code incorrectly 3 times (not necessarily in the same session) will invalidate the correct PIN code. In such a case you will have to contact your service provider for a PUK code to unblock your SIM card.

- Some SIM cards are set up so that PIN number entry cannot be turned off.
- When SIM PIN lock is enabled, you can change the PIN code.

PIN2 code

Your phone supports advanced feature that may require a PIN2 code to be entered before they can be accessed or modified. Entering your PIN2 code incorrectly 3 times (not necessarily in the same session) will invalidate the correct PIN2 code. In this case you will have to contact your service provider for a PUK2 code.

No.	Security	Security		
1	Change PINs	Changes the PIN or PIN2 code. (PIN activate setting must be turned on to change the PIN code.)		
2	PIN activate	Turns on/off the PIN code entry required at starting up the phone-up.		
3	Change security code	Change the security code which is used to set some of functions and unlock the Personal Information Manager (PIM) features. The default setting of the security code is "0000".		
4	Phone lock	Turns on/off the Phone lock function which will lock the phone: you can only make emergency calls or enter the security code. After entering the correct security code, you can use the phone normally. Dupon power-up, you are prompted to enter the security code if the Phone lock was active when the phone was powered down.		

No.	Security (Continued)				
5	Bar calls	You can bar the following calls made/received on your phone: All outgoing (dialled) calls, international outgoing (dialled) calls, international outgoing (dialled) calls except to home, all incoming (received) calls or incoming (received) calls when roaming.			
		1	Change settings	→ Highlight the type of restriction and the call type, and then ○ → r to save changes.	
				 Key in your bar calls password to verify user identification to the network SK1 to confirm and save changes to the network. 	
The select			The selected settings have red bars over their icons.		
		2	Set password	Bar calls facilities are network services and may require a password. Changes the bar calls password.	
6 Fixed dialling Turns on/off the fixed dialling which restricts the use of dialled number to only the Fixed (FDN).		, ,			
The FDN facility is network dependent.			twork dependent.		
		9 S	ee also: "Fixed diallin	g numbers (FDN)" on page 48.	

Network (M18)

For settings provided on the Network screen, see "Roaming" on page 13.

Reset settings (M19)

This function will reset your phone to its factory settings.

- By restoring the factory settings, any changes you have made to your phone except the following will return to the factory settings (the following data/settings will not be reset):
 - Settings: Set time other than Remote time, Set date, Language, all settings in Calls other than Auto redial, all Security settings other than Change security code, SIM list settings in Network.
 - · All call lists and call information
 - Phonebook: All Phonebook entries. The settings for Groups.
 - Accessory: All Schedule, ToDo, Notepad and Voice memo entries. All the settings other than Clock alarm, Play list for Music player, View events
 for Scheduler and Sort for ToDo.
 - i-mode: All Bookmarks, Saved pages, Go to webpage, and Mail settings. All the i-mode related settings.

- Java: All the Java™ applications.
- Message: All the stored messages. The settings for Msg filter, Msg filter details, and SMS centre number.
- Mv data: All stored files.

Message (M2)

Message overview

Message services

Your phone supports the following messaging services:

- Short Messaging Service (SMS) allows you to send short messages (160 half-pitch characters max.) to one or more phone numbers. To send an SMS message, the destination phone number must be a mobile phone with an SMS service subscription. SMS service also supports Enhanced Messaging Service (EMS) for which the maximum length of the message you can send depends on the number of linked messages (maximum of 10 linked messages are available).
- Mail (i-mode messaging service) allows you to send a message to not only other cellphones but also to PCs and other devices that uses Email addresses. You can attach files from Pictures, Videos and Sounds in My data (see page 61). Mail facility is available from the Mail screen under the i-mode facility. For details on the mail service, see "i-mode (M3)" on page 33.
- Multimedia Messaging Service (MMS) is a service that allows you to send messages of a slideshow of text and multimedia files. When you receive
 an MMS message, you will be notified by a message from the MMS centre. You can either automatically or manually receive the contents of an
 MMS message. MMS facility is available from the Mail screen under the i-mode facility. For details on the mail service, see "i-mode (M3)" on
 page 33.
- The Message Services are network dependent.

Sending/Receiving messages

While an SMS message is being sent or received, a name, a number and a CLI picture will be displayed (if a name and CLI picture have been stored with the number in your phonebook). The received messages are stored on the SIM card or in your phone memory. When you receive a message, your phone will ring or beep during a call, a new message icon will be shown on your phone's display and its LED will glow.

🔁 Please delete the unnecessary messages in the folders from time to time. The phone cannot receive any messages when the Inbox folder is full.

Message screen

To display the Message screen, ■■■ 2 or press and hold Press the appropriate key for the required option.

No	. Message screen	Message screen menu

Cell broadcast (M27)

Cell Broadcast (CB) messages (e.g. weather reports, news) are sent by the network to all phones in a certain area.

- 🤎 Broadcast messages service is network dependent. Please contact your service provider for details.

i-mode (M3)

Using your phone's browser facility, you can enjoy i-mode services such as browsing information on i-mode sites (programs) and other Internet web pages, and sending/receiving i-mode messages which include the mail and MMS (including SMIL).

- You can download melody files, images, animations, videos and Java™ applications to your phone's memory. Some files with restrictions cannot be saved to your phone's memory, even though they can be downloaded and played or displayed.
- Pror the definitions of the icons related to i-mode, see "LCD and displayed icons" on page vii.

i-mode operation guide

You can access various i-mode functions by selecting the menus on the main four i-mode related screens: i-mode screen, i-mode menu screen, iMenu screen and Mail screen. The following table gives an outline of the procedures related to the i-mode services.

Action	Procedure		
Browsing the i-mode sites/Internet w	veb pages		
Display the homepage	Press and hold () or SK2 → 6 → 3		
	You need to set the homepage URL in Home page beforehand (see "Set homepage" on page 41).		
Display a web page	SK2 → 6 → 1 to key in the address, or 2 to select an address in the history.

Creating a new MMS

- SK1 → 2 → The Compose menu screen is displayed
- Using Compose menu options, create an MMS (for details, see the table "Compose menu options" on page 36) → SK2 → The Compose MMS screen is displayed
- Set the addressee and key in the subject (see "Creating a new mail" for details).
- To send the MMS, highlight Send → ○
- To save the MMS, highlight Save → ○

Composing an MMS

From the Compose MMS or Edit MMS screen, highlight SMIL \rightarrow \bigcirc \rightarrow The slide is displayed \rightarrow \bigcirc

No.	o. Compose menu options					
_	Add/Delete media	1	Add/Delete text	Adds new text data or deletes the text data in the text field on the slide.		
		2	Add/Delete image	Adds an image file or deletes the image file in the image field on the slide.		
		3	Add/Delete audio	Adds a sound file or deletes the sound file in the sound field on the slide.		
		4	Add/Delete video	Adds a video file or deletes the video file on the slide.		
-	Exit	Shift	ts to the Compose MMS	S screen.		
-	Save	Sav	es the currently created	MMS.		
-	Preview	Disp	lays the created slides	in order from the beginning at the preset playback time for each.		
-	Add slide	1	Add slide	Adds a new slide after the currently displayed slide.		
		2	Insert slide	Inserts a new slide just before the currently displayed slide.		
-	Delete slide	Dele	etes the currently displa	yed slide.		
-	Text colour	Sele	ects the Text colour from	n the 16 different colours.		
-	Background colour	Selects the Background colour from the 16 different colours.				
-	Set Fit mode	Sele	ects the size in which the	e image/video is displayed.		
		1	Hidden	Displays the image/video in the actual size.		
		2	Fill	Displays the image/video in the reduced size so that the height and width fit into the image/video display area.		
		3	Meet	Displays the image/video in the reduced size so that the longer side of the height or width fits the corresponding side of the image/video display area.		
		4	Slice	Displays the image/video in the reduced size so that the shorter side of the height or width fits the corresponding side of the image/video display area.		
-	Options	Sets the length of time a slide is displayed, and sets the beginning and end times for text, image or sound within that slide display time.				
		Pou cannot set the beginning and end time for video files.				
_	Resize region	Changes the region size of the image/video field and the text field, using the ▲ and ▼ keys.				
-	Switch positions	Switches positioning of the image/video field and text field on the slide.				
-	Previous slide	Displays the previous slide.				
_	Next slide	Disp	Displays the next slide.			

- Depending on the conditions, some options may be displayed in gray and not be available.
- When you finish editing SMIL, **SK1** to return to the Compose MMS screen.
- If necessary, edit the composed mail/MMS using the Edit menu options menu (see "Using the Edit menu options" for details).

Using the Edit menu options

From the Compose mail/Compose MMS/Edit mail/Edit MMS screen, (NEW) to display the Edit menu options.

No.	Edit menu options					
-	Send	Sends the mail.				
-	Save	Saves the mail being edited to the draft folder.				
-	Attach file	Attaches a file to the mail.				
-	Delete attachment	Deletes the attached file(s).				
-	Play/View file	Plays or displays the attached file.				
-	Open phonebk.	Adds the destination directly from the phonebook.				
-	Add To/Cc/Bcc	Adds a To/Cc/Bcc field.				
-	Change to To/Cc/Bcc	Changes the highlighted Cc/Bcc/To field to a To/Cc/Bcc field.				
-	Del. address	Deletes a destination field.				
-	Attach header/sign. Attaches a stored opening sentence at the start or a stored signature at the end of the text.					
-	Del. message Deletes the message of the mail being edited.					
-	Del. mail Deletes the new mail currently edited.					

Depending on the conditions, some options may be displayed in gray and not be available.

Reading a received mail/MMS

- SK1 → 3 → The list of mail/MMS in the Inbox folder will be displayed.
- ➡ Highlight the message to read → → The message content will be displayed. Scroll the message content.
- To view the previous message ◀, to view the next message, ►
- While reading a received mail/MMS in the Inbox folder, you can use various functions. See "Inbox" on page 42.
- If Auto play is on (see "Auto play" on page 45), the MMS/SMIL will be automatically played/displayed. if not, press SK1 to start playing.
- Provided the font size by pressing and holding the ◀ and ▶. ▶ enlarges the font size, while ◀ reduces it.

i-mode screen

From the i-mode screen you can change the i-mode related settings of your phone.

MENU 3 → The i-mode screen will be displayed.

No.	i-mode screen menus								
1	i-mode	Displ	Displays the i-mode menu screen (For details, see "i-mode menu screen menus" on page 39).

		6	Delete	Deletes the current saved page.			

No.	i-mode menu scree	en menus (Sheet 3 of 3)				
8	Settings	Changes the settings of your browser.				
		1	Set time out	Disconnects the connection after the set time. You can set 60 seconds or 90 seconds, or disable this function.		
		2	Load images	Sets whether to display images contained in web pages.		
		3	Wrap text	Sets whether to display text as is on web pages and mail/SMIL text, or wrap it to fit your phone's screen.		
		4	Certificates Displays the certificate information and validates/invalidates a certificate.			
		5	Send terminal info	Sets whether to send the terminal information to the Information Providers (IPs).		
				If you agree to send private information (e.g. production serial No. and SIM No.) to the IPs via the Internet, it may be obtained by others.		
		6	Set homepage	Validates the homepage and sets the URL.		
				Tou can display the homepage by pressing and holding () from the standby screen.		
		7	Video auto play	Sets whether to play a video file automatically after the download is completed.		
		8	Check settings	Displays all the options set for the settings (browser).		
		0	Back	Returns to the i-mode menu screen (see "i-mode menu screen" on page 38).		

Depending on the conditions, some options may be displayed in gray and not be available.

iMenu screen

From the iMenu screen you can access the various services, and also use the function menus of your browser such as adding a bookmark, saving a web page and creating a message.

SK2 or (MENN) 3 1 to display the i-mode menu screen → 1 to display the iMenu screen → (MENN) to display the browser options menu.

No.	Browser options menu				
-	Add bookmark	Bookmarks the current page.			
-	Bookmarks	Displays the Bookmark list.			
		This option is displayed only when one or more bookmarks are registered.			
-	Save image	Saves an image on the current page.			
		This option is displayed only when one or more images are displayed on the current screen.			

No.	Browser options mei	Browser options menu (Continued)				
-	Save page	Saves the current page.				
-	Add to phonebook	Saves the phone number displayed in the current page in the phonebook.				
		This option is displayed only when one or more phone numbers are displayed on the current screen.				
-	Certificate info	Displays the server certificate of the current page.				
		This option is displayed only when the current page is a SSL page.				
-	Go to webpage	e Displays a page by keying in the URL or using the access history (see "Go to webpage" on page 39).				
-	Reload	Updates the data on the current page.				
-	Page info	Displays the URL of the current page.				
-	Add desktop icon	d desktop icon Creates a desktop icon of the URL of the current page.				
-	Create message	Creates a new message with the highlighted phone number or Email address in the message text.				

🖐 If you agree to send private information (e.g. production serial No. and SIM No.) to the IPs via the Internet, it may be obtained by others.

Pressing CLR or nmay not bring back the previous screen. Screen operations depend on the current screen content.

Mail screen

From the Mail screen you can use the i-mode message services.

- SK1 or (MENU) 3 1 2 to display the Mail screen.
- The available options differ depending on the operators.
- If an error occurs while sending mail, it will be saved in the Draft folder as an unsent mail.
- The same mail can be sent to up to five addresses.
- If you save a mail while editing, it will be saved in the Draft folder.

No.	Mail screen menus (Sheet 1 of 5)					
1	Compose mail	Displ	Displays the Compose mail screen (see "Creating a new mail" on page 35).			
2	Compose MMS	Displ	Displays the Compose MMS screen (see "Creating a new MMS" on page 35).

8	Mail settings	Char	nges the mail settings.		
		1	Edit header	Edits the header to be added at the beginning of a mail, and sets whether to add it automatically.	
				 → Highlight the checkbox → ○ to place a check, to automatically add a header. → Highlight the text box → ○ to edit the header → Edit the text → ○ 	
		2	Edit signature	Edits the signature to be added at the end of a mail, and sets whether to add it automatically.	
				 → Highlight the checkbox → ○ to place a check, to automatically add the signature. → Highlight the text box → ○ to edit the signature → Edit the text → ○ 	
		3	Reply marker	Edits the reply markers to be added when replying to a mail with quotations from the original.	
				■ Highlight the text box → ○ to edit the reply marker → Edit the text → ○	
		4	Auto play	Sets whether to automatically play or display the sound, image or video file attached, when you open the mail.	

No.	Mail screen menus	(Shee	(Sheet 5 of 5)			
8	Mail settings (Continued)	5	Auto reception	Sets whether to automatically retrieve a mail after receiving the incoming mail notification.		
				When this setting is turned on your phone will automatically receive mail. If it is turned off, you will have to manually retrieve from your i-mode service provider using the Check new mail of iMenu screen (see "Check new mail" on page 45).		
		6	Receive	Sets the attachment file type that can be received.		
			attachment			
		7	Attachment data	Selects whether to receive Melody For i-mode (MFi) files attached to a mail.		
		8	Font size	Sets the font size to display the mail/MMS.		
		9	Check settings	Displays the values set to the above mail settings.		
		0	Back	Returns to the Mail screen.		
0	Back	Returns to the i-mode screen.				

Depending on the conditions, some options may be displayed in gray and not be available.

i-mode glossary

The following defines the basic terms used in this section.

Term	Definition
Site (program)	An Internet contents page especially designed for i-mode users, which can be accessed from your i-mode top screen of your IP.
Mail	Mail is the messaging service of i-mode. You can not only exchange messages with other cellphones, but also with PCs, PDAs, etc.
MMS	Multimedia Messaging Service lets you send messages with image/video/sound files attached. The MMS type message is also referred to as an MMS.
SMIL	The SMIL lets you combine text, sound, image and video into a slide, to create original slideshows. The message created by SMIL is also referred to as a SMIL. A SMIL message is a kind of MMS message.
Access history	Your phone stores up to 10 URLs you have accessed. You can refer to this list when you want to go to a web page you have accessed recently.
Web page	An Internet contents page compatible to i-mode services, which can be browsed using your phone, including the sites (programs).

Term	Definition
Bookmark	A bookmark contains the URL of a web page. You can save up to 50 bookmarks and use them for easier accesses.
Certificate information	If you are displaying a Secure Sockets Layer (SSL) page designed to enable safe data transmission, you will be able to see its certificate information.
IP	Information Provider. Your IP provides you the i-mode sites (programs).
Home page	A web page that is set in your profile as the page to connect to when you press and hold () from the standby screen.
Saved pages	You can save up to 20 web pages in your phone memory, for quick off-line access.

Phonebook (M4)

Phonebook types

Your phone can have up to 7 directories stored on your SIM card and in your phone memory:

- Complete (a list of all the numbers stored in the ADN and FDN)
- Personal directories (ADN) in the SIM card
- · Personal directories (ADN) in the phone memory
- Service dialling numbers (SDN)
- Fixed dialling numbers (FDN)
- Own number
- Voice mail number
- When viewing any of the directories described, you can switch to the other directories (if your SIM card supports them) by pressing 🐵.
- The maximum number of phone numbers that can be stored on a SIM card is the total of the ADN, FDN and SDN directories.
- When you activate the phonebook, the directory which you were referring to the last time will open.

Personal directory (ADN)

These numbers are known as abbreviated dialling numbers (ADN). There are two types of ADN, one is the phonebook stored in the phone memory (the phonebook (Phone)) and the other is the phonebook stored on the SIM card (the phonebook (SIM)).

Phonebook (SIM)

- Up to 255 personal data can be stored in the SIM card.
- Each personal data contains a phone number, a name and a location number.
- The number of phone numbers that can be stored on a SIM card depends on the SIM card capability.

Phonebook (Phone)

Up to 500 personal data can be stored in your phone memory. Each personal data is given a location number (1 to 500), and it can be allocated to a group.

To each personal data, you can set the following:

- 7 phone numbers (Home, Mobile, Work, Data, Fax, Other phone x 2)
- 2 Email addresses
- 2 descriptive information
- · Group, Voice tag, LED colour, a CLI picture and a ringer tone
- Up to 10 phone numbers can have a voice recognition recording allocated to them.

Fixed dialling numbers (FDN)

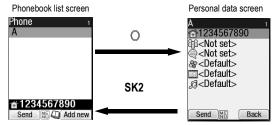

Fixed dialling numbers are a means of limiting which numbers can be called from your phone. With the FDN feature switched on (see page 26), you can call with your phone the numbers you have stored in this phonebook and the emergency number only.

🌄 Although FDN is supported by your phone, it must be present on your SIM card - check with your service provider.

Service dialling numbers (SDN)

The numbers stored in the SDN directory are pre-installed by your service provider. They will call numbers and services as agreed with your supplier (e.g. customer enquiries, billing information, sportslines, weatherlines, etc.) and cannot be edited by you.

🤍 Although SDN is supported by your phone, it must be present on your SIM card - check with your service provider.

Accessing your phonebook (M4)

You can store personal information in the phonebook of your phone or your SIM card.

Displaying a personal data (M41)

■ 4 1 and the appropriate key for the desired directory or 🖾 until the required directory is displayed → Highlight the required personal data → O

Displaying information about your phonebook (M42)

- MENU 4 2 to display the information about your phonebook.
- This function is SIM dependent.

Call options (M43)

- Por details on the Call options screen, see "Call options (M43)" on page 9.

Phonebook list Options menu

- When editing the data in FDN, you will be prompted to enter PIN2 code.
- Depending on the condition, some options may be displayed in gray and not be available.
 - 4 1 and the appropriate key for the desired directory or <a>\text{\$\times\$}\$ until the required directory is displayed <a>\text{\$\times\$}\$ Highlight the required personal data

Scratchpad number

Your phone has a scratchpad facility that enables you to take down a phone number during a call and then make a call to it when you have finished. This scratchpad number can be stored in memory for future use.

Noting & calling a scratchpad number

■ During a call, key in the number to be placed in the scratchpad. It will be shown on your phone's screen → n when the call is finished. The number will still be displayed. Press reto dial the displayed number.

Voice mail (M417)

Voice mail function enables you to forward received calls to the Voice mail centre, and the caller can leave voice messages in your voice mail mailbox. You may be notified by an icon on the standby screen if the caller leaves a voice message.

뿻 The voice mail service is network dependent. Contact your service provider for details on your voice mail number.

Setting the Voice mail number

- This function is available when the Voice mail number has not been set.
 - **▼** (MENU) 417 → Highlight the required line → () twice → () → key in the voice mail number → () → SK1 to save the change.

Forwarding a call to the Voice mail centre

Set the voice mail centre number (see "Setting the Voice mail number" for details) -> Set up Call diversion (see "Call diversion (M161)" on page 11 for details). When you receive a call set to be diverted, the call will be diverted to the voice mail centre.

Retrieving a Voice mail

- This function is available when the Voice mail number has been set.
 - ✓ MENU 417 → Highlight the required line →
 - You can also retrieve a voice mail by pressing and holding 1 from the standby screen.
 - To set up the line to call the voice mail centre, see "ALS setup" on page 21 for details.

Camera (M5)

Camera function enables you to take pictures or record videos and save them as Joint Photographic Expert Group (JPEG) files and 3rd Generation Partnership Project (3GPP) files respectively. You can enjoy the picture and video files in many ways: send them attached to an MMS or Mail, set a picture file as the wallpaper for your phone, etc.

Notes on using the camera

Handling the Camera

- The camera of your phone is manufactured using high-precision technology. However, there may be dots or lines on the screen that appear darker or brighter than the others. Note also that when you are shooting or recording in dimly-lit places, the amount of noise (such as red and blue dots or horizontal lines) may increase noticeably.
- Be careful not to apply force to the lens when closing your phone. This could damage the lens.
- Fingerprints or grease on the lens can result in focusing problems or dark images. Wipe the lens clean with a soft cloth before use.
- The image quality may be degraded after your phone has been left for a long period in a warm place.
- Exposing the camera to direct sunlight for a long period could discolour the camera's internal colour filter and cause discoloured images.
- Camera mode is automatically cancelled if none of the phone's keys are pressed for 3 minutes or longer.

Precautions when taking pictures/recording videos

- You cannot switch the camera's shutter sound off. The shutter makes a clicking sound when you take a picture or start/end a video recording, even when the phone is in Meeting mode.
- Avoid camera shake. Moving the phone when you take a picture will result in a blurred image. Hold the camera firmly to keep it still when you take a picture, or use the auto timer to take the shot.
- As there is a slight delay from the time you press the shutter (O) until the picture is actually taken, do not move the camera until you hear the shutter sound.
- If taking a picture with not enough light, try to hold the phone still as much as possible, and for a longer period of time after the shutter sound: the shutter speed may be slower in a darker environment.
- Note that if you attempt to shoot directly into a strong light source, such as the sun, another bright light or the high reflecting target with strong light, the image may contain washed-out white highlights or be disrupted.
- While recording, be careful not to cover the mouthpiece of your phone as it is used as the microphone to record sound along with the video.

Copyright information

- Images and videos shot or recorded on your phone cannot be used in ways that infringe copyright laws without the consent of the copyright holder, unless intended only for personal use. Note that some restrictions apply to the photographing of stage performances, entertainments and exhibits, even when intended purely for personal use.
- Users are also asked to note that the transfer of images protected under copyright laws is only permissible within the restrictions imposed by those copyright laws.
- 🖐 Be considerate of other people's privacy when you take a picture or record a video using the camera of your phone and send it to others.

Taking a picture (M51)

- To activate the camera function, press and hold Side up or press (MENU) 51
- Look into the camera view finder screen and adjust the camera position to place the target on the screen.
- You can switch the camera view finder screen between the main-LCD and the 2nd-LCD by pressing *.
- You can take a picture while the phone is closed.
- Hold the phone still
 → To use the shutter,
 or Side up → Check the picture → If successfully taken,
 → Saved as a JPEG file in Pictures
- After taking a picture, press **SK1** to send the taken picture attached to a message, and press **SK2** to discard the picture.
- The default file name for the picture is the date, month, year and sequence number. When you take pictures in burst mode, the saved files will be named by the default file names plus a consecutive two-digit number at the end.
- If a call comes in while you are checking or saving a photographed image, image storage is cancelled. When this occurs, the next time you select camera function a message appears to say that you have an image that was not stored, allowing you to check and store the image.
- Before taking a picture, you can switch to the video camera function by pressing SK2. This use of SK2, however, is invalid if the self-timer function is activated.

Operations when taking a picture

- To turn the light on or off, SK1 or Side down
- Take care not to hold the light too close to your or other people's eyes when the light is lit.
- To zoom in and out, ▲ or ▼
- You can also select x1,x2,x3 or x4 magnification from the Zoom setting on the Camera Options menu.
- To turn on/off the camera view finder on the full screen, press #.
- Depending on the photo size, there may be parts not seen on the full screen view finder display in the saved picture.
- To control the brightness level of the picture, ◀ or ▶

My data (M6)

Using My data, you can playback sound and music (MP3) files, or display pictures and videos downloaded from the Internet or captured with the camera function of your phone.

Videos (M61)

In the following section, how to playback video files (videos) stored in your phone is described. You can either record videos using your phone, download them from the Internet, receive them attached to MMS messages. There are two pre-set folders: My movies and Download.

Replaying the video files

- ▼ 1 or @ 61 → Highlight a folder → ▶ or → Highlight a video file you wish to replay → → The video file will be replayed
- 10 When the flat view function is activated, the list of folders is not displayed. The list of all the stored video files is displayed.
- If you wish to move to another hierarchy folder, use ◀ and ▶
- Pressing # before playing a video file will enlarge the replay screen size, and pressing # again will return the screen size to normal.
- For the definitions of the icons displayed while replaying, see "LCD and displayed icons" on page vii.

Operations while replaying video

- To stop. SK2
- To pause, SK1 → While pausing, SK1 again to restart and continue the replay.
- To fast forward/rewind, ◀ or ▶ → SK1 or will stop the fast forwarding/rewinding.]

- To enlarge the replay screen size, #
- To adjust the volume, Side keys
- To display the previous/next file, ▲ or ▼
- You cannot fast forward, rewind or enlarge the screen for video files with only sound but no image.

Sounds (M62)

In the following section, procedures to playback and delete desired sound items are described. There are three pre-set folders: Download, Preset and Voice memo.

Selecting and playing sound

- ▼ 2 or 6 2 → Highlight a folder → ▶ or → Highlight a sound file you wish to replay → ○
- When the flat view function is activated, the list of folders is not displayed. The list of all the stored sounds files is displayed.
- If you wish to move to another hierarchy folder, use ◀ and ▶
- When a folder is highlighted, you cannot use **SK1**.

Operations while playing sound

- To stop, SK2
- To adjust the volume, **Side** keys.
- To replay the previous/next file, ▲ or ▼

Pictures (M63)

The Pictures function allows you to display images and animations, which were obtained with the camera function of your phone, received as a file attached to MMS messages, or downloaded from the Internet. The images can also be edited using this function. From the Pictures function you can also attach images and animations to MMS messages you compose. There are five pre-set folders: Photo, Preset, Download, Frame and Stamp.

Displaying the Pictures view screen

- ▼ 3 or MENU 6 3 → Highlight a folder → ▶ or → Highlight an image file you wish to display → ○
- To display the previous/next image file, ▲ or ▼
- When the flat view function is activated, the list of folders is not displayed. The list of all the stored image file is displayed.
- If you wish to move to another hierarchy folder while the Thumbnail view is turned off, use ◀ and ▶

Cutting the image

- → Highlight or display the image file you wish to edit → (MENU) 13 → Select the image size → A frame indicating the cut area appears on the preview screen.
- When you select Free, a cross indicator appears on the preview screen. Move it to the point to start a frame and O to confirm the position. Then, expand the frame into the required size and O to confirm.

Reducing the image size

■ Highlight or display the image file you wish to edit → (MENU) 14 → Select the image size → SK1 if the image is favorable.

Rotating the image

- Highlight or display the image file you wish to edit → (NEND) 15 → SK1 to rotate the image 90 degrees clockwise
- Keep pressing SK1 until the image is at the required angle → to confirm.

Decorating the image with stamps

- → Highlight or display the image file you wish to edit → MENU 16
- To apply a marker stamp, 1 → Highlight the required stamp → () → The marker stamp position is displayed in centre
- If you wish to preview the highlighted stamp, press SK1
- \frown To apply a text stamp, $2 \rightarrow$ Key in the text $\rightarrow \bigcirc \rightarrow$ The text stamp position is displayed in centre
- Move the stamp position → O to confirm → The stamp preview is displayed again. Repeat applying if necessary. → SK1 when finished applying the stamp (the stamp preview will not be applied this time)

Adding a frame to the image

→ Highlight or display the image file you wish to edit → (ETW) 17 → Highlight a frame → () to preview the resulting image → Scroll through the various frames by A and ▼ → () to confirm.

Saving the edited image

Music (M64)

In the following section, the procedures to display and play your music files from Music are described. There is one pre-set folder: Download.

Selecting and playing a music file

▼ 4 or MENU 6 4 → Highlight the music file you want to play → ○

- When the flat view function is activated, the list of folders is not displayed. The list of all the stored music files is displayed.
- To create your own playlist, see "Music player (M81)" on page 68.

Operations while playing a music file

- To stop, SK2
- To adjust the volume, Side keys.
- To replay the previous/next file, ▲ or ▼

Calculator (M82)

You can perform addition, subtraction, multiplication and division with the calculator. It also has a memory function.

- The calculator can display a result of up to 9 digits. If a calculation results in a number exceeding the maximum, the screen displays error in the calculation field.

Calculator Key Assignment

For calculator function, the keys are assigned different functions. The following shows the key assignment:

Key	Operation	Key	Operation
•	Addition (+)	◀	Subtraction (–)
A	Multiplication (×)	•	Division (÷)
0	Equals to (=)	SK2	Memory Addition (2 nd)/Memory Store
SK1	Memory Recall (2 nd)/Memory Cancel	40	Percent (%)
MENU	Inversion (±)	ô	Exit calculator
~	Decimal Point (.)	CLR	Delete digit (if held, all clear)

Clock alarm (M83)

This feature enables you to switch the clock alarm function on/off and to set the time, repetition and alarm tone.

Turning the alarm on/off

★ MENU) 83

Clock alarm setting		
On/Off	Turns on or off the alarm.	
Set time	Sets the time and am/pm (for 12 hour format) at which the alarm will sound.	

Clock alarm settin	Clock alarm setting (Continued)		
Set alarm tone	Sets the melody to be played when the alarm occurs (optional). See "Sounds (M62)" on page 62		
Alarm repeat	Selects alarm repeat for once, daily or day of the week.		
	You can select more than one day of the week at the same time.		
	You can remove the check by highlighting and pressing () again.		
Enter alarm text	Sets the message (e.g. Wake up!) which is displayed when the alarm occurs (optional).		

- When all settings are done, SK1 to save the setting.
- The selected melody will be played when the alarm occurs if the ringer is turned on based on the current phone mode. If vibration is turned on, you will be notified of the alarm by vibration.
- Even if the phone has been switched off, the phone automatically switches itself on and sounds the alarm or vibrates at the specified time.
- You can stop the alarm tone or vibration by pressing any key.

Scheduler (M84)

Scheduler enables you to enter reminders and appointments for particular time and date.

Adding a new event

■ MENU 8 4 → Highlight the day → ① to display the day's schedule list screen (if any) → SK1.

Scheduler setting								
Event date/time	Event date/time Sets the day, month, year, time and am/pm (for 12 hour format) of the event.							
Description	ription Sets the event description (optional).							
Repeat	Selects repeat for One time only, Daily, Weekly or Monthly.							
Reminder	Turns on or off the reminder.							
Reminder tone	Associates a reminder tone with an event. You can set the reminder tone only when the Reminder is turned on.							
Private	Sets the event as a private event. Place a check mark to set the event as a private event. To set the event as a public event, do not place a check mark.							

- When all settings are done, SK1 to save the setting.
- The selected melody will be played when the scheduled event occurs if the ringer is turned on based on the current phone mode. If vibration is turned on, you will be notified of the event by vibration.

- If the phone has been switched off, the phone does not switch itself on to sound the reminder or vibrate at the specified time.
- You can stop the reminder tone or vibration by pressing any key.
- If the event is a private event, the reminder will be sound at the specified time but the entered description will not be displayed on the LCD. You are prompted to enter the security code to view the details of the private event.

Viewing the scheduled events

- ▼ (MENU) 8 4 → Highlight a day (SK1 to display the previous monthly/weekly view screen or SK2 to display the next monthly/weekly view screen)
- ○ to display the day's schedule list screen (To display the previous/next day's schedule list screen,
 ◄ or ▶).
- to display the detail screen of the highlighted schedule.

Scheduler Options menu

Depending on the conditions, some options may be displayed in gray and not be available.

Voice memo (M87)

Voice memo function allows you to record up to 60 seconds of sound/voice, using your phone's microphone.

Recording/playing voice memo or setting speaker

● MENU 87

No.	Voice memo setting								
1	Record	Record Records a voice memo.							
		SK1 to start recording.							
		Pu You can finish recording and save the data as a file by pressing SK2 even before the recording is completed.							
		To record the conversation during a call, see "Recording a call" on page 9							
2	Play	Plays a voice memo or recorded call.							
		→ Highlight a voice memo → ○ to start playing and SK2 to stop playing.							
3	Speaker setting Selects between speaker and earpiece to play the voice memo.								
		■ 1 for the Speaker, or 2 for the Earpiece.							

See also: "Sounds (M62)" on page 62.

Currency (M88)

Currency function allows you to convert an amount of money in one currency to another.

Converting currency

→ MENU 8 8

Currency setting	
From	Sets the source currency code.
То	Sets the destination currency code.
Exchange rate	Sets the exchange rate. If you wish to change the exchange rate, CLR to delete the displayed exchange rate and key in the required number (for decimal point, SK1).
Amount	Sets the amount of money you wish to convert (for decimal point, SK1).

If you have made a mistake in entering the amount, CLR to delete individual number or SK2 to cancel the entry and return to the previous screen, and then start again.

Resetting the currencies

MENU 8 8 and SK1

Infrared (M89)

Infrared function enables you to receive data (phonebook/picture/video/sound excluding MP3/schedule/ToDo list/note data) from other devices, or a cellphone of the same model via the infrared port. This function also enables you to use your phone as a modem for your PC via the infrared port to establish a dial-up connection to an Internet service provider

- This function is not available during a call.
- Pror details, see "IR Data Exchange" on page 17.

No.	Infrared setting					
1	IR receive Receives data via infrared.					
		After the data has been received, SK1 to save the received data.				
2	IR modem	Uses your phone as a modem for your PC via infrared.				
		After the IR connection is established, the idle screen with an Infrared icon and a General Packet Radio Service (GPRS) icon will be displayed for GPRS connection, and the Circuit Switched Data (CSD) connection screen will be displayed for CSD connection.				

Your phone consumes a lot of battery power when used as a modem. After using your phone as a modem, be sure to deactivate the modem function from your PC or press

(for the CSD connection only). When the modem function is deactivated, the idle screen will be displayed without the Infrared icon and GPRS icon.
