### 1 General

#### 1.1 Using Hand and ESD Protection

When handling this product, keep all surfaces clean of dirt, dust, debris, and hand oil. Use appropriate ESD precautions when working on this product. The use of finger cots or gloves, an ESD mat, and an ESD wrist strap are required at minimum.

#### **1.2** Protection of LCDs, Lenses, and Windows

Any time the screen portion of a display assembly, the windows of a display cover, or a camera lens is unprotected and will be exposed for an extended period of time, add a protective film over the exposed part to reduce the amount of dust, finger prints, debris, and/or damage that the part may obtain.

#### 1.3 Acceptable Pry Tools

Whenever the phrase "pry tool" is used, a nylon pointer or a front opening tool may be used, depending on the user's preference.

#### 1.4 Discharge Camera Flash before Disassembly

Before performing any disassembly, discharge the camera flash by performing the following steps.

- 1) Close the lens cover
- 2) Install a battery
- 3) Power the phone on and go to the Service Test Menu
- 4) Select the "Discharge Flash" option
- 5) Wait several seconds until the strobe light flashes
- 6) Power the phone down

# NOTE! The phone may still contain residual voltage that can discharge through skin contact, but it is not enough to cause injury. This discharge may be avoided by wearing rubber gloves.

### 1.5 Required Tools

The following tools will be needed.

-	Tools		
Torque Driver	ERICSSON S		
Nylon Pointer			
Style 2A ESD Tweezers			
T6 Torx <sup>©</sup> Bit			
JCIS No. 0 screw bit			
Dental Tool			

### 2 Disassembly

The following subsections make up the disassembly procedure. Before starting disassembly, check that there is a protective film over the display window. If the window lacks a protective film, clean the window and add a protective film.

These subsections are arranged in the order that they must be performed to properly disassemble this product.

### 2.1 Battery Cover Removal

	Step-by-Step Instructions		
NC	DTE!	Discharge the camera flash before performing any disassembly. Refer to section 1.4 for instructions on how to properly discharge the flash.	4
1.	and to	ge the battery cover by pushing it down ward the end of the phone where the a connector is located.	
2.	Once of phone.	dislodged, slide the battery cover from the	

### 2.2 Battery Removal

	Step-by-Step Instr	uctions
1.	Lift the accessible end of the battery so that it comes out of the battery cavity.	
2.	Grip the lifted end of the battery and pull the battery out of the battery cavity.	

### 2.3 Antenna Cover Removal

	Step-by-Step Instruc	ctions
1.	Remove the two screws indicated with a torque driver and a JCIS No. 0 screw bit.	Preference P22 DWVD CENSOTOND Unitor at 2002 2 Make in China
2.	Slightly lift the edge of the antenna cover as shown and work a pry tool along the seam to unlatch the two latches holding that side of the antenna cover in place.	

	Step-by-Step Instruc	tions
1.	Remove the four screws indicated using a torque driver and a T6 bit.	
2.	Remove the memory stick cover completely from the phone by pulling out the tab that connects the cover to the phone.	
N	DTE: Remove the memory card if present.	
3.	Using style 2A tweezers, remove the power button by pulling it out of the front cover.	

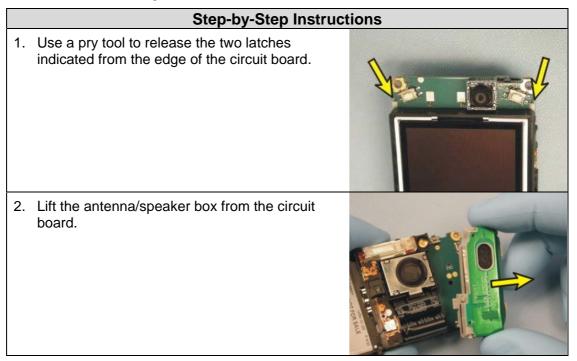

### 2.4 Phone Core Separation from Front Cover

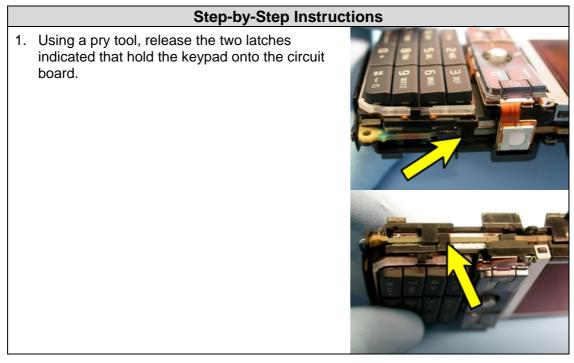

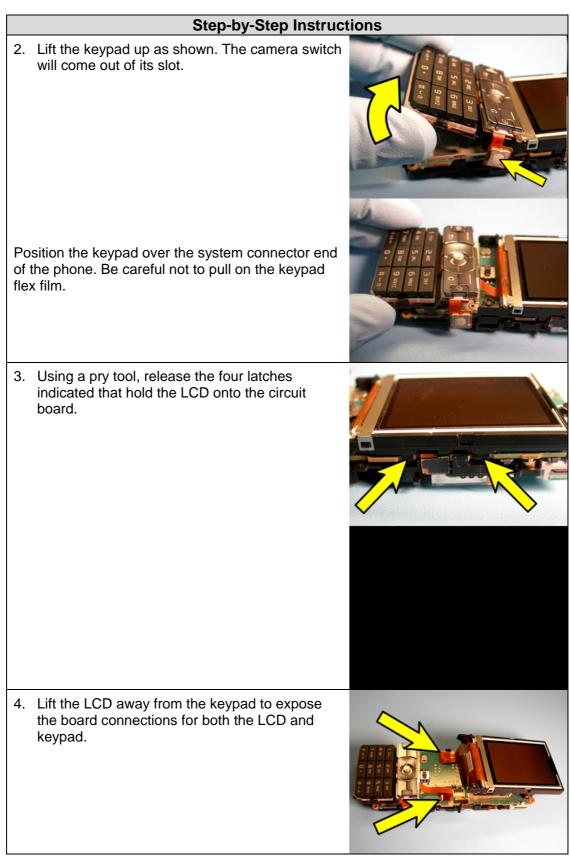

#### 2.5 Antenna/Speaker Box Removal from Circuit Board

### 2.6 Accessing LCD and Keypad Circuit Board Connections

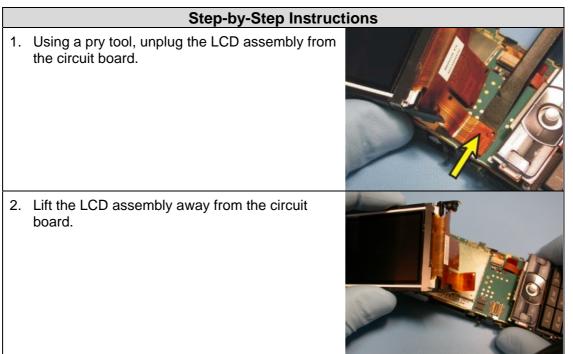

### 2.7 LCD Disconnection from Circuit Board

#### 2.8 Keypad Disconnection from Circuit Board

	Step-by-Step Instru	ctions
1.	Using a pry tool, unplug the keypad assembly from the circuit board.	
2.	Lift the keypad assembly away from the circuit board.	

#### 2.9 Board Frame Removal from Circuit Board

	Step-by-Step Instruc	tions
1.	Locate the flash assembly's flex film connection to the circuit board.	
2.	Rotate the black portion of the connector toward the flex film as shown.	
3.	Pull the flex film from the connector.	
4.	Remove the shield can lid by using a pry tool at each corner.	

	Step-by-Step Instructions			
5.	Using a pry tool, disconnect the rear camera assembly from the circuit board.			
6.	Using a pry tool, release the six latches in the order shown from the edge of the circuit board.			
7.	Rotate the circuit board about 15 degrees from the board frame as shown.	A A		
N	DTE! When lifting the circuit board, carefully work the rear camera's flex film through the hole in the circuit board.			
8.	Pull the circuit board out of the board frame as shown.			

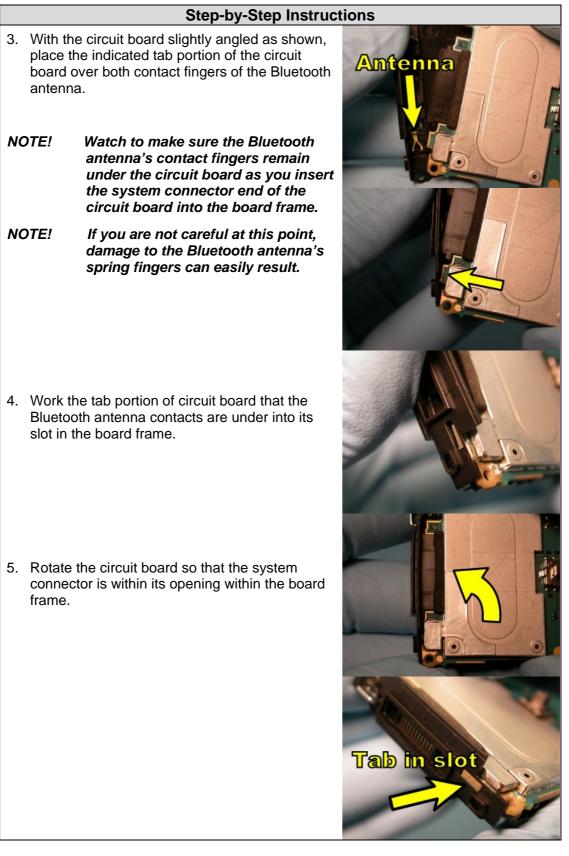

### 3 Reassembly

The following subsections make up the reassembly procedure. These subsections are arranged in the order that they must be performed to properly reassemble this product.

#### 3.1 Board Frame Attachment to Circuit Board

	Step-by-Step Instruc	tions
1.	Verify that the flash assembly is installed on the board frame.	
2.	Verify that the rear camera and vibrator are installed in the board frame as shown.	

		working instruction, weethunicut
	Step-by-Step Instruc	tions
6.	Move the flash assembly's flex film connection from between the board frame and the circuit board.	
7.	Feed the rear camera's flex film through the large hole in the circuit board and rotate the circuit board onto the board frame.	
8.	Snap the six latches over the edge of the circuit board in the order shown.	
9.	Plug the rear camera assembly into its circuit board connection.	
10	Install the shield can lid as shown. Press down on each corner of the lid to make sure it is completely seated.	

Step-by-Step Instruc	tions
11. Rotate the black retaining bar of the flash connector toward the edge of the circuit board.	
12. Slide the flash assembly's flex film into its circuit board connector until the tab portion of the flex film is against the connector.	Tab
13. Rotate the black retaining bar away from the flex film until it is flush against the circuit board.	

### 3.2 Keypad Connection to Circuit Board

 Step-by-Step Instructions

 1. While holding the keypad assembly upside down over the rear camera, plug the keypad assembly's flex film into its connector on the circuit board.
 Image: Colspan="2">Image: Colspan="2" Co

#### 3.3 LCD Connection to Circuit Board

	Step-by-Step Instruction	ons
1.	Verify that the flex film extending from the LCD is behind the two features of the LCD holder that are indicated.	
2.	Hold the LCD assembly over the circuit board as shown and plug the LCD assembly's flex film into its connector on the circuit board.	

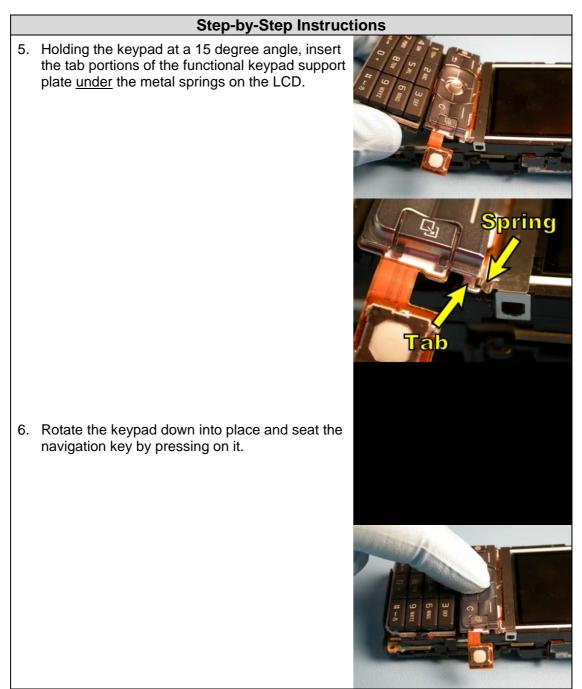

### 3.4 Placement of the LCD and Keypad Assemblies

	Step-by-Step Instruc	tions
1.	Rotate the LCD assembly down onto the circuit board so that the LCD flex film folds underneath the LCD assembly as shown.	
2.	Verify that a conductive cylinder is located in the hole in the LCD holder indicated.	
3.	Position the LCD to the circuit board so that the conductive cylinder is aligned with its corresponding conductive pad on the circuit board.	Cylinder Pad

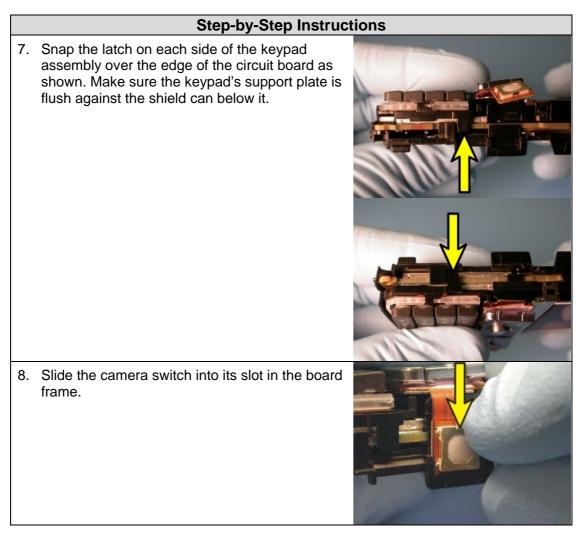

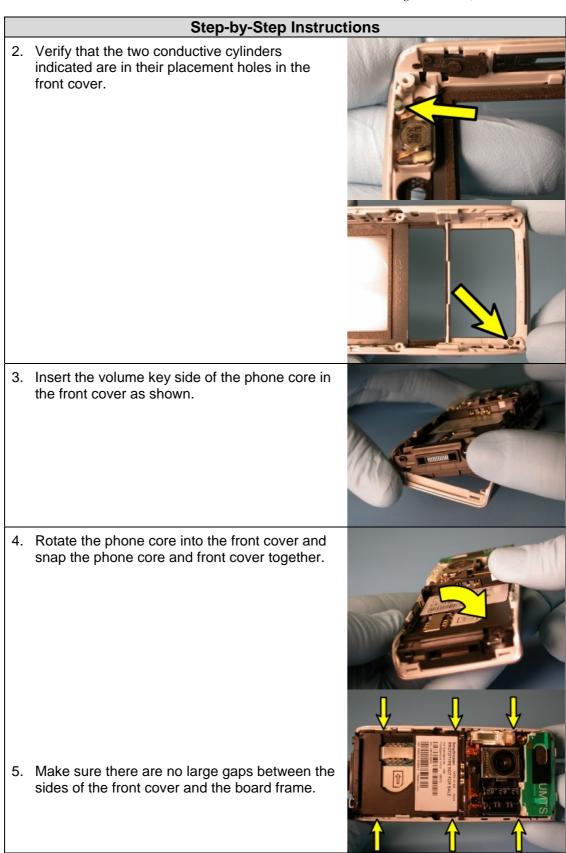

### 3.5 Antenna/Speaker Box Attachment to Circuit Board

	Ctan by Ctan Instr	
	Step-by-Step Instr	uctions
1.	Insert the tab portion of the antenna/speaker box in the slot in the board frame under the capacitors.	
2.	Snap the two latches of the antenna/speaker box assembly indicated over the edge of the circuit board.	

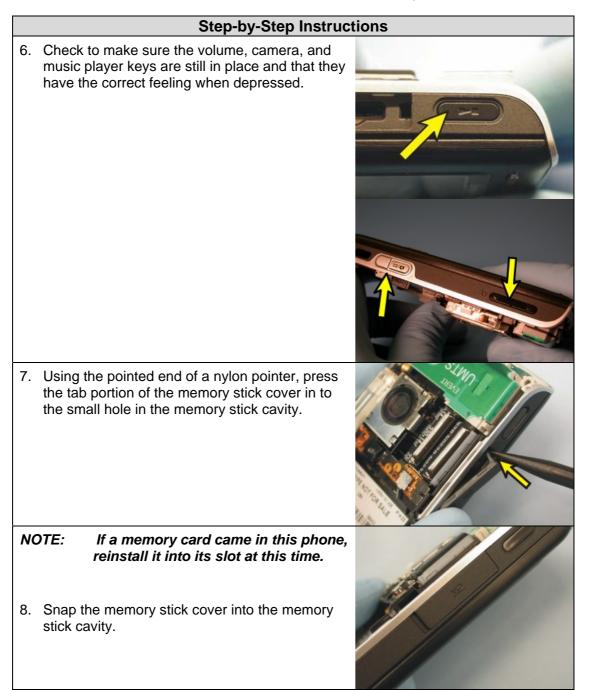

### 3.6 Phone Core Installation into Front Cover

Step-by-Step Instruc	tions
<ol> <li>Verify that the receiver, volume key, camera key, and music player key are present and correctly positioned in their openings in the front cover.</li> <li>NOTE! All three keys must be mounted securely onto their alignment pins for the keys to stay in place when installing the phone core.</li> </ol>	

	Step-by-Step Instructions			
1.	Close the camera cover on the antenna cover assembly.			
2.	Insert the two tabs indicated on the antenna cover into the corresponding slots in the end of the phone in which the power key is located.	Slots Contraction of the second secon		

#### 3.7 Antenna cover Installation

Step-by-Step Instructions		
3. Rotate the antenna cover down onto the phone		
and snap it in place.		
NOTE! When the antenna cover is correctly installed there should be no gaps in the seam where the antenna cover and front cover come together.		
<ol> <li>Install two M1.7 screws in the locations indicated using a torque driver set at 10 N*cm with a JCIS No. 0 bit.</li> </ol>	Pretory get Numer (P.P. 2) Pretory get Numer (P.P. 2) Drector (P. 2) Drecto	

### 3.8 Battery Installation

 Step-by-Step Instructions

 1. Insert the contact end of the battery into the cavity as shown.
 Image: Colspan="2">Image: Colspan="2" Image: Colspa="">"The Colspan="2" Image: Colspan="2" Ima

#### 3.9 Battery Cover Installation

	Step-by-Step Instruc	ctions
1.	Position the battery cover as shown.	
2.	Slide the battery cover into place. Make sure it snaps into place.	

### 4 Part Replacement

#### 4.1 Antenna cover

#### **Replacement Procedure**

- Remove the old part by performing sections 2.1 2.3 of the disassembly procedure.
- Obtain a new part.
- Using the new part, perform sections 3.7 3.9 of the reassembly procedure.
- Remove the antenna port plug from the old antenna cover by performing section 4.23.1.
- Install the antenna port plug in the new antenna cover by performing section 4.23.2.

#### 4.2 Label

#### 4.2.1 Label Removal

• Perform sections 2.1 - 2.3 of the disassembly procedure

	Step-by-Step Instruc	tions
<ol> <li>Before removing the old label from a phone, print a new label.</li> </ol>		
NOTE!	The text on the new label must be fully readable and all barcodes must be scannable.	
NOTE!	The old label only has to be removed if there are two or more labels already on the phone.	Sony Ericsson 1/KRH 101 428 R3A/4 PROTOTYPE NOT FOR SALE
	ne old label from the battery cavity. The vill tear while removing it.	Net Type approved CB6 Protopse
NOTE!	Avoid damaging the battery contacts when removing the label.	IMEI COLOCIDIA 128223 Mass in China
NOTE!	Clean off any remaining adhesive residue from the battery cavity using alcohol and a lint-free wipe.	

#### 4.2.2 Label Installation

Step-by-Step Instructions			
NC	DTE!	No more than two labels are allowed stacked on top of each other. If there are already two labels on the phone, perform the label removal procedure before continuing.	
1.		v label has not been created yet, then do is time.	
NC	DTE!	Be very careful not to contact the battery contacts with the sticky side of the label.	
2.	Locate	the rectangular recessed area indicated	
3.		he edge of the label that mounts closest battery connection in the recessed area	
4.		oll the rest of the label down into the area on the floor of the battery cavity.	Sony Ericsson 1/KRH 101 428 R3A/4 PROTOTYPE NOT FOR SALE Not Type approved CB5 Prototype build FP2 2 05/413
	smooth	ne label is correctly positioned, carefully the label into place. section 3.7 - 3.9 of the reassembly proce	

• Perform section 3.7 - 3.9 of the reassembly procedure

#### 4.3 Front Cover

#### **Replacement Procedure**

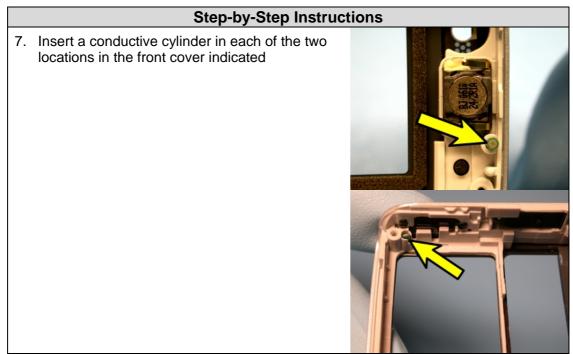

• Perform sections 2.1 - 2.4 of the disassembly procedure.

		()
<u> </u>	Step-by-Step Instruc	tions
1.	Using a pry tool, pry the receiver from its location in the old front cover using the tab on the side of the receiver as the prying location.	Tab
2.	Obtain a new receiver.	
3.	Obtain a new front cover.	
4.	Position the new receiver in the new front cover's receiver cavity so that the tips of receiver's spring fingers are pointing toward the display window.	

	Step-by-Step Instru	ictions
5. Press ensure <b>NOTE!</b>	the receiver against the front cover to e it sticks well. <b>Do not press on the receiver's sprin</b> <i>fingers</i>	g
the m	fer the volume key, the camera key, and usic key from the old front cover to the ront cover. Make sure all three keys are mounted securely onto their alignment pins.	
		Pin
		Pins
		Pins

• Perform section 3.6 - 3.9 of the reassembly procedure.

#### 4.4 Antenna/Speaker Box Assembly

#### **Replacement Procedure**

- Remove the old part by performing section 2.1 2.5 of the disassembly procedure.
- Obtain a new antenna/speaker box assembly.
- Using the new part, perform section 3.5 3.9 of the reassembly procedure.

## 4.5 Rear Speaker Cloth Replacement procedure

#### • Perform sections 2.1 - 2.3 of the disassembly procedure

	Step-by-Step Instruc	tions
1.	Locate the rear speaker cloth on the inside surface of the antenna cover.	
2.	Using style 2A tweezers, peel the speaker cloth from the antenna cover.	
	Clean the speaker cloth attachment area with alcohol and a lint-free wipe. Obtain a new rear speaker cloth and place it within the corresponding recessed area on the	
	antenna cover as shown.	
5.	Gently and carefully apply pressure to the foam portion of the speaker cloth so that the speaker cloth sticks well.	

• Perform sections 3.7 - 3.9 of the reassembly procedure

### 4.6 Vibrator

### **Replacement Procedure**

• Perform sections 2.1- 2.9 of the disassembly procedure

Step-by-Step Instruc	tions
<ol> <li>Remove the old vibrator from the board frame by lifting up on the exposed bottom edge of the vibrator using the flat end of a pry tool.</li> </ol>	
<ul> <li>NOTE! Be careful not to damage the vibrator contacts when handling the new vibrator.</li> <li>2. Obtain a new vibrator and set it in the board frame's vibrator cavity in the orientation shown.</li> </ul>	
<ul> <li>NOTE! Do not press on the vibrator's spring fingers when pressing the vibrator into its cavity.</li> <li>3. Press the vibrator down into its cavity until it is completely control.</li> </ul>	
completely seated.	

• Perform sections 3.1 – 3.9 of the reassembly procedure.

## 4.7 Keyfoil Assembly Replacement Procedure

• Perform sections 2.1 - 2.8 of the disassembly procedure.

	Step-by-Step Instruc	ctions
1.	Dislodge the functional keyboard portion of the keyfoil assembly from the support plate by prying between the two parts in the two locations indicated.	
2.	Disengage one of the two latches holding the functional keyboard on the keyfoil assembly.	
3.	Press on the back of the navigation key portion of the functional keyboard to dislodge the functional keyboard from the keyfoil assembly.	
4.	Near the middle of the bottom edge of the numeric keyboard, slide one side of the tip of a style 2A tweezers between the numeric keyboard and keyfoil assembly.	

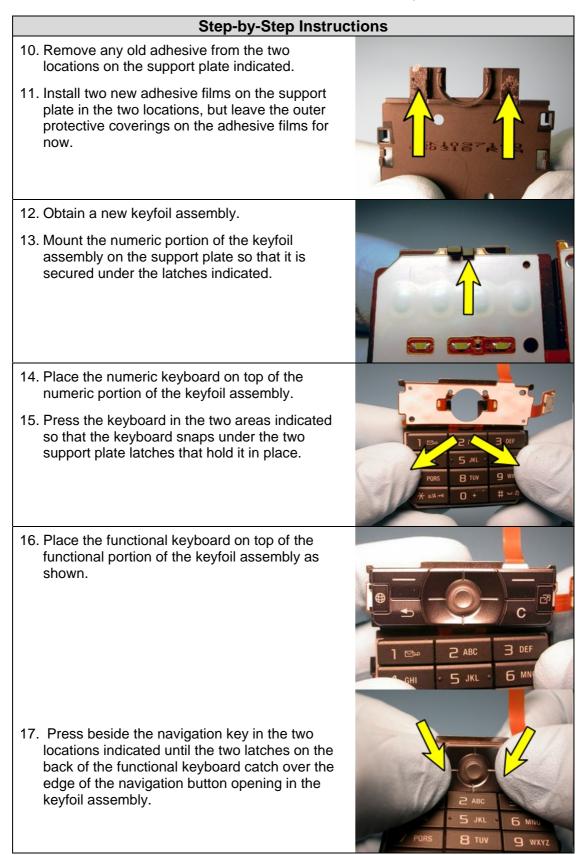

## 🍯 Sony Ericsson

		-
	Step-by-Step Instruc	tions
5.	Slightly rotate the tweezers tip away from the numeric keyboard until the keyboard separates from the support plate.	
6.	Lift the numeric keyboard from the keyfoil assembly and set it aside.	
7.	Near the middle of the edge of the keyfoil assembly shown, slide one side of the tip of a style 2A tweezers between the keyfoil assembly and the support plate.	
8.	Slightly rotate the tweezers tip away from the keyfoil assembly until the keyfoil separates from the support plate.	
9.	Lift the keyfoil assembly away from the support plate.	

Sony Ericsson

Step-by-Step Instruc	tions
18. Remove the protective coverings from the two adhesive films on the support plate.	
19. Press the functional portion of the keyfoil assembly and the support plate together so that the two parts properly bond.	

• Perform sections 3.2 - 3.9 of the reassembly procedure.

## 4.8 Function Keypad

### **Replacement Procedure**

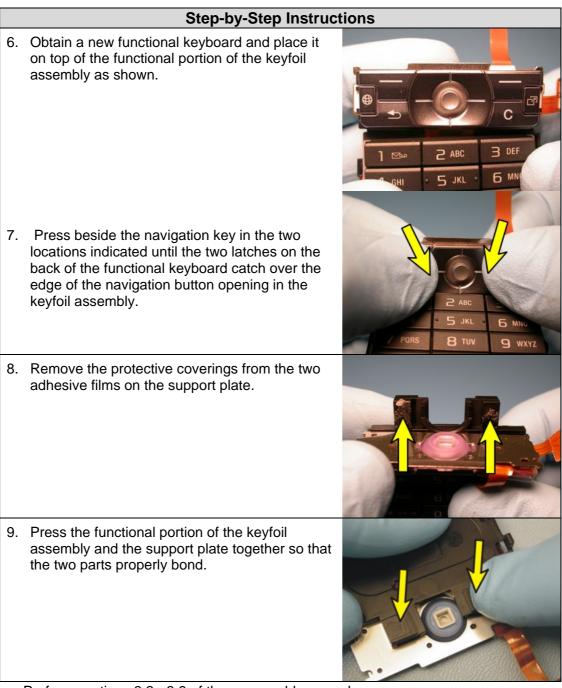

• Perform sections 2.1 - 2.8 of the disassembly procedure.

	Step-by-Step Instruc	ctions
1.	Dislodge the functional keyboard portion of the keyfoil assembly from the support plate by prying between the two parts in the two locations indicated.	
2.	Disengage one of the two latches holding the functional keyboard on the keyfoil assembly.	
3.	Press on the back of the navigation key portion of the functional keyboard to dislodge the functional keyboard from the keyfoil assembly.	
4.	Remove any old adhesive from the two locations on the support plate indicated.	5 0HI 5 7Kr 6
5.	Install two new adhesive films on the support plate in the two locations, but leave the outer protective coverings on the adhesive films for now.	

## Sony Ericsson

#### Working Instruction, Mechanical

• Perform sections 3.2 - 3.9 of the reassembly procedure.

## 4.9 Numeric Keypad Replacement Procedure

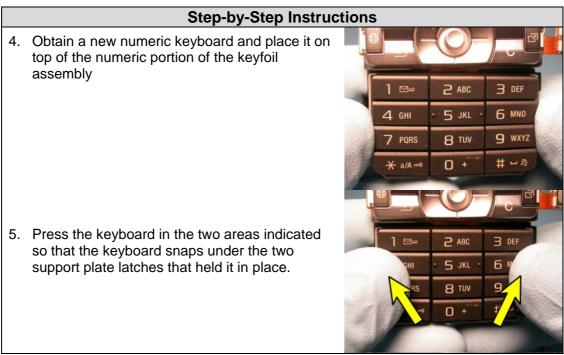

• Perform sections 2.1 - 2.8 of the disassembly procedure.

	Step-by-Step Instruc	tions
1.	Near the middle of the bottom edge of the numeric keyboard, slide one side of the tip of a style 2A tweezers between the numeric keyboard and keyfoil assembly.	
2.	Slightly rotate the tweezers tip away from the numeric keyboard until the keyboard separates from the support plate.	
3.	Lift the numeric keyboard from the keyfoil assembly and set it aside.	

## Sony Ericsson

Working Instruction, Mechanical

• Perform sections 3.2 - 3.9 of the reassembly procedure.

# 4.10 Keyfoil Support Plate

### **Replacement Procedure**

• Perform sections 2.1 - 2.8 of the disassembly procedure.

	Step-by-Step Instruc	ctions
1.	Dislodge the functional keyboard portion of the keyfoil assembly from the support plate by prying between the two parts in the two locations indicated.	
2.	Near the middle of the bottom edge of the numeric keyboard, slide one side of the tip of a style 2A tweezers between the numeric keyboard and keyfoil assembly.	
3.	Slightly rotate the tweezers tip away from the numeric keyboard until the keyboard separates from the support plate.	
4.	Lift the numeric keyboard from the keyfoil assembly and set it aside.	

## 🍯 Sony Ericsson

	Step-by-Step Instruc	tions
5.	Near the middle of the edge of the keyfoil assembly shown, slide one side of the tip of a style 2A tweezers between the keyfoil assembly and the support plate.	
6.	Slightly rotate the tweezers tip away from the keyfoil assembly until the keyfoil separates from the support plate.	
7.	Lift the keyfoil assembly away from the support plate.	
8.	Obtain a new support plate and install two new adhesive films on the support plate in the two locations indicated, but leave the outer protective coverings on the adhesive films for now.	
9.	Mount the numeric portion of the keyfoil assembly on the support plate so that it is secured under the latches indicated.	

• Perform sections 3.2 - 3.9 of the reassembly procedure.

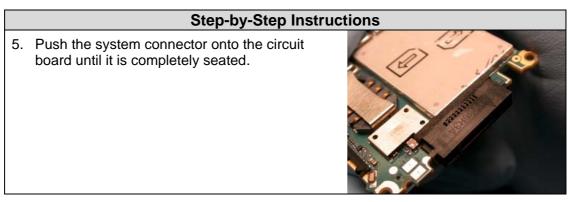

## 4.11 System Connector Replacement Procedure

• Perform sections 2.1 - 2.9 of the disassembly procedure.

	Step-by-Step Instruc	tions
1.	Pull the system connector away from the end of the circuit board.	
2.	Remove the foam pad from the end of the circuit board.	
3.	Obtain a new foam pad and install it on the end of the circuit board so that the shiny side of the foam pad will be adjacent to the system connector.	Shiny Side
4.	Obtain a new system connector and align the row of small holes in the system connector with the row of contact pads on the circuit board.	

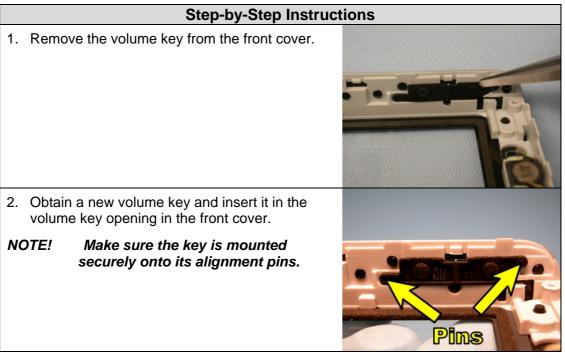

• Perform sections 3.1 – 3.9 of the reassembly procedure.

### 4.12 Volume Key

#### **Replacement Procedure**

Perform sections 2.1 – 2.4 of the disassembly procedure.

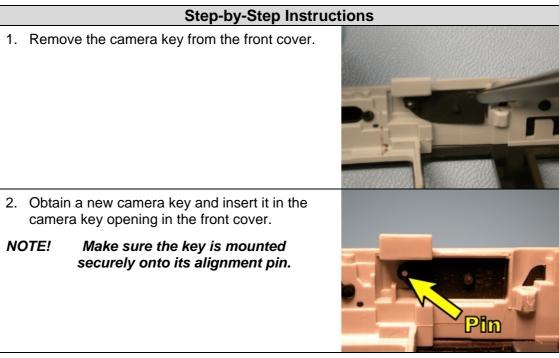

• Perform sections 3.6 – 3.9 of the reassembly procedure.

### 4.13 Camera Key Replacement Procedure

• Perform sections 2.1 – 2.4 of the disassembly procedure.

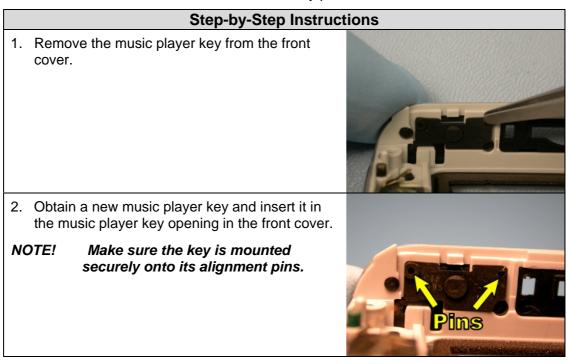

• Perform sections 3.6 – 3.9 of the reassembly procedure.

### 4.14 Music Player Key Replacement Procedure

• Perform sections 2.1 – 2.4 of the disassembly procedure.

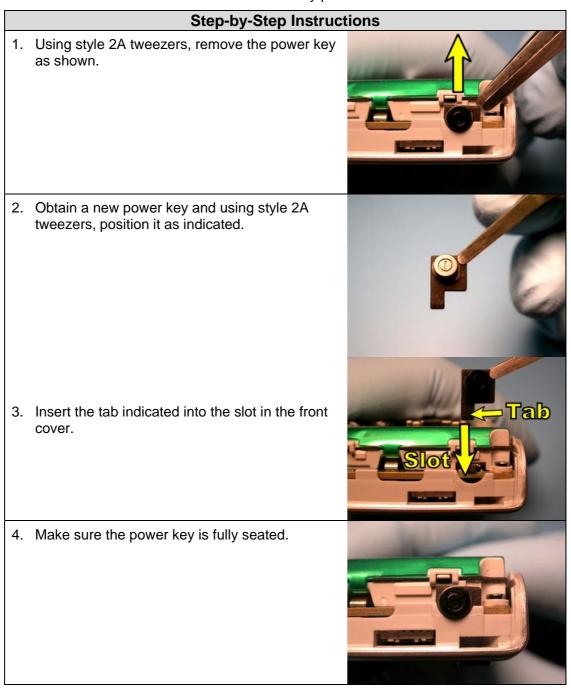

• Perform sections 3.6 – 3.9 of the reassembly procedure.

### 4.15 Power Key Replacement Procedure

### Perform sections 2.1 – 2.3 of the disassembly procedure.

• Perform sections 3.7 – 3.9 of the reassembly procedure.

## 4.16 LCD Assembly

### **Replacement Procedure**

• Perform sections 2.1 – 2.7 of the disassembly procedure.

	Step-by-Step Instruc	tions
1.	Locate the metal retaining strap on the old LCD assembly.	
2.	Use style 2A tweezers to unlatch one side of the metal retaining strap.	
3.	Remove the metal retaining strap from the LCD assembly.	
4.	Remove the LCD from the LCD holder.	

## 🍯 Sony Ericsson

Working Instruction, Mechanical

	Step-by-Step Instruc	ctions
5.	Obtain a new LCD and position it into the LCD holder.	
6.	Position the LCD flex film behind the two portions of the LCD holder as shown.	
7.	Install the metal strap onto the LCD assembly.	
8.	Make sure both ends of the metal strap are correctly latched as shown.	

Perform sections 3.3 - 3.9 of the reassembly procedure. ٠

٠

### 4.17 LCD Holder

### **Replacement Procedure**

Perform sections 2.1 - 2.7 of the disassembly procedure

	Step-by-Step Instruc	tions
1.	Locate the metal retaining strap on the old LCD assembly.	
2.	Use style 2A tweezers to unlatch one side of the metal retaining strap.	
3.	Remove the metal retaining strap from the LCD assembly.	
4.	Remove the LCD from the LCD holder and set aside.	

	Step-by-Step Instru	Ictions
5.	Obtain a new LCD holder and position the old LCD into the new holder.	
6.	Position the LCD flex film behind the two portions of the LCD holder as shown.	
7.	Install the metal strap onto the LCD assembly.	
8.	Make sure both ends of the metal strap are correctly latched as shown.	

• Perform sections 3.3 – 3.9 of the reassembly procedure.

### 4.18 Receiver

### **Replacement Procedure**

• Perform section 2.1-2.4 of the disassembly procedure.

	Step-by-Step Instructions			
1.	locatio	a pry tool, pry the receiver from its n in the front cover using the tab on the the receiver as the prying location.	Tab
